The Best Australian Science Writing 2015 Bianca Nogrady, 2015-11-01 The annual collection celebrating the finest Australian science writing of the year How does dust connect the cosmos with our bed sheets Why do lobsters do the Mexican Wave backwards And what makes us feel wetness when there s no such thing as wet nerve receptors Now in its fifth year The Best Australian Science Writing 2015 draws on the knowledge and insight of Australia s brightest thinkers in examining the world around us From our obsession with Mars to the mating habits of fish this lively collection covers a range of topics and delights in challenging our perceptions of the planet we think we know **Alan Turing: The Enigma** Andrew Hodges, 2014-11-10 A NEW YORK TIMES BESTSELLER The official book behind the Academy Award winning film The Imitation Game starring Benedict Cumberbatch and Keira Knightley It is only a slight exaggeration to say that the British mathematician Alan Turing 1912 1954 saved the Allies from the Nazis invented the computer and artificial intelligence and anticipated gay liberation by decades all before his suicide at age forty one This New York Times bestselling biography of the founder of computer science with a new preface by the author that addresses Turing s royal pardon in 2013 is the definitive account of an extraordinary mind and life Capturing both the inner and outer drama of Turing s life Andrew Hodges tells how Turing s revolutionary idea of 1936 the concept of a universal machine laid the foundation for the modern computer and how Turing brought the idea to practical realization in 1945 with his electronic design The book also tells how this work was directly related to Turing s leading role in breaking the German Enigma ciphers during World War II a scientific triumph that was critical to Allied victory in the Atlantic At the same time this is the tragic account of a man who despite his wartime service was eventually arrested stripped of his security clearance and forced to undergo a humiliating treatment program all for trying to live honestly in a society that defined homosexuality as a crime The inspiration for a major motion picture starring Benedict Cumberbatch and Keira Knightley Alan Turing The Enigma is a gripping story of mathematics computers cryptography and homosexual persecution **The National Observer Index** ,1970 Vols for 1969 75 include section Top news of the week in review *English Mechanic and World of Science* ,1874 *Scientific Handicapping* Ira S. provide an utterly false basis for scientific inference They also expose the well known non probabilistic philosophies of Popper Lakatos and Kuhn as similarly unscientific Scientific Reasoning shows how Bayesian theory by contrast with these increasingly discredited approaches provides a unified and highly satisfactory account of scientific method an account which practicing scientists and all those interested in the sciences ought to master **BOOK JACKET Popular Science Monthly and World Advance** ,1937 *La Fleur's Magazine* ,2003 *Patrick Suppes: Scientific Philosopher* P.
