The Role of Nursing in Public Health Promotion and Education Carlos Sequeira,Leticia De Lima Trindade ,Olga Ribeiro,2025-10-14 As a society we face huge challenges in tackling the health and well being of the population Nursing staff play a pivotal role in public health promotion and education serving as advocates educators and healthcare providers within various settings Every nurse not just those working in specialist public health roles can become a health promoting practitioner Their diverse skills and expertise make them essential assets in promoting public health preventing diseases and improving the overall well being of the public individuals and communities in both personal and professional settings Nursing is vital throughout the lifespan of the individual This Research Topic aims to highlight the essential role of nursing in driving public health initiatives fostering health promotion and delivering education to individuals families and communities By exploring innovative strategies best practices and research findings this issue seeks to shed light on the diverse responsibilities and impactful contributions of nursing staff in promoting public health and advancing healthcare outcomes Through the dissemination of best practices and research findings this issue aims to inspire collaboration improve healthcare outcomes and strengthen the impact of nursing staff in promoting public health and education Some themes of interest are but not limited to 1 Nursing Leadership in Public Health This theme will focus on the leadership role of nursing staff in public health promotion and education It will highlight effective leadership strategies competencies and models that empower nursing staff to lead public health initiatives collaborate with interdisciplinary teams and drive positive change in community health The discussion will explore the impact of nursing leadership on healthcare system transformation and population health outcomes 2 Health Education and Health Promotion This topic will delve into the crucial role of nursing staff in health education and promotion It will showcase innovative approaches evidence based practices and effective communication strategies employed by nursing professionals to empower individuals and communities to make informed health decisions The discussion will encompass topics such as health literacy behavior change interventions and culturally sensitive education 3 Community Engagement and Partnership This theme will explore the significance of community engagement and partnerships in public health promotion and education It will delve into the collaborative efforts of nursing staff with community organizations public health agencies and stakeholders to address health disparities develop targeted interventions and improve community health outcomes The discussion will highlight successful community engagement models and strategies for fostering sustainable partnerships 4 Disease Prevention and Health Promotion Programs This topic will focus on the role of nursing staff in designing implementing and evaluating disease prevention and health promotion programs It will showcase innovative programmatic approaches evidence based interventions and best practices in areas such as immunization campaigns screening initiatives and lifestyle modification programs The discussion will emphasize the impact of nursing staff in fostering behavior change and improving health outcomes 5 Technology and Digital Health in

**Public Health Education** This theme will explore the integration of technology and digital health in public health education initiatives led by nursing staff. It will discuss the utilization of digital platforms, mobile applications and telehealth in delivering health education, promoting self care and enhancing patient engagement. The discussion will encompass considerations of accessibility, equity and the potential of technology to reach diverse populations. **Mindfulness, Mind-body Exercises, and Health Promotion** Guodong Zhang, Yang Cao, Zi Yan, 2025-02-14. High intensity sports and physical exercise have been linked to various health benefits. However, when it comes to increasing longevity, these activities may not be an ideal option for the general population. Mind body exercise, which combines physical exercise with mindfulness, may be more effective in promoting and restoring health, especially for those with chronic symptoms or poor health conditions. Many mind body exercises such as Taichi, Qigong, Chan Chuang and Yoga have their roots in Eastern cultures. They have gained popularity around the world and became a new fashion in the post COVID 19 era. These exercises typically help practitioners shift their focus from the outside world past or future to the present moment through gentle body movements. Mind body exercises emphasize the body's innate ability to heal itself. By disconnecting from the noisy outside world, the body is given the opportunity to heal. This aligns with the classic belief in Chinese medicine that the body itself is the best medicine.
