Beyond the Algorithm Deepa Das Acevedo, 2020-11-05 Qualitative empirical research reveals that the narratives and real life experiences defining gig work have concrete implications for law

**Ethics of Data and Analytics** Kirsten Martin, 2022-05-12 The ethics of data and analytics in many ways is no different than any endeavor to find the right answer When a business chooses a supplier funds a new product or hires an employee managers are making decisions with moral implications The decisions in business like all decisions have a moral component in that people can benefit or be harmed rules are followed or broken people are treated fairly or not and rights are enabled or diminished However data analytics introduces wrinkles or moral hurdles in how to think about ethics Questions of accountability privacy surveillance bias and power stretch standard tools to examine whether a decision is good ethical or just Dealing with these questions requires different frameworks to understand what is wrong and what could be better Ethics of Data and Analytics Concepts and Cases does not search for a new different answer or to ban all technology in favor of human decision making The text takes a more skeptical ironic approach to current answers and concepts while identifying and having solidarity with others Applying this to the endeavor to understand the ethics of data and analytics the text emphasizes finding multiple ethical approaches as ways to engage with current problems to find better solutions rather than prioritizing one set of concepts or theories The book works through cases to understand those marginalized by data analytics programs as well as those empowered by them Three themes run throughout the book First data analytics programs are value laden in that technologies create moral consequences reinforce or undercut ethical principles and enable or diminish rights and dignity This places an additional focus on the role of developers in their incorporation of values in the design of data analytics programs Second design is critical In the majority of the cases examined the purpose is to improve the design and development of data analytics programs Third data analytics artificial intelligence and machine learning are about power The discussion of power who has it who gets to keep it and who is marginalized weaves throughout the chapters theories and cases In discussing ethical frameworks the text focuses on critical theories that question power structures and default assumptions and seek to emancipate the marginalized

*Global Meets Digital* Vinod Jain, 2023-06-02 The world today is at the intersection of two megatrends Globalization and Digitalization a business revolution unfolding in real time *Global Meets Digital* captures the many nuances of this revolution succinctly including its impact on our lives and business An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years such as diminishing returns to scale and resource scarcity are no longer valid for a large and growing number of products and services The book will challenge you to think differently not just about digital products but also about physical products In the global digital world products are of three kinds physical digital and smart machines products that are both physical and digital and connected to the internet a distinction missed by most books on strategy and global business The economics of each kind of

products is distinct from that of the others which has strategic implications for all kinds of businesses implications such as how to compete and how to create and capture value With several mini case studies and over 100 company examples the book covers themes and cutting edge issues like the paradox of globalization digital disruption disruptive business models exponential technologies Internet of Things competition in digital markets winner take all market dynamics Industry 4.0 how to innovate strategizing for the New Normal and value creation and value capture in both B2C and B2B contexts The book derives its underpinnings from the practice of global and digital business while theory remains in the background Intended specifically for an executive professional audience Global Meets Digital should also be of value to business students and professors learning to dip their toes into a digital world Vinod Jain is an expert in global and digital strategy award winning professor Fulbright Scholar and author of an MBA textbook Global Strategy He taught at the Rutgers Business School Newark and New Brunswick and the Robert H Smith School of Business University of Maryland College Park At Maryland he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China Since leaving Maryland he has taught in China Denmark Finland Poland and India as a visiting or term professor His opinion pieces have appeared in The Washington Post The Baltimore Sun Mensa Bulletin and Economic Times and Mint India's 1 and 2 business dailies among other media In the past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta
