Materials and Process Selection for Engineering Design Mahmoud M. Farag,2013-11-19

Introducing a new engineering product or changing an existing model involves making designs reaching economic decisions selecting materials choosing manufacturing processes and assessing its environmental impact These activities are interdependent and should not be performed in isolation from each other This is because the materials and proce

Materials and Process Selection for Engineering Design, Second Edition Mahmoud M. Farag,2008

Taking a practical approach this work illustrates how design materials and process selection must mesh together and be considered along with economic and environmental analysis when developing a new product or changing an existing model It also considers the trade offs that must sometimes be made This second edition adds and revises topics such as environmental function and aesthetic considerations in design environmental impact assessment of materials and processes life cycle and recycling economics and materials substitution The book begins with an intro that

reviews stages of product development. This is followed by three sections covering Mechanical failures environmental degradation and materials that resist different types of failure. Elements of engineering design and the effect of material properties and manufacturing processes on the design of components. Economic and environmental aspects of materials and manufacturing processes as well as quantitative and computer assisted methods for screening ranking alternatives and deciding on the optimum material process combination. Examples and detailed case studies illustrating practical applications as well as materials selection and substitution from a variety of industries are included. Each chapter begins with clear objectives and ends with a summary review questions and bibliography. Appendices supply tables of composition and properties and a glossary of technical terms. SI units are used with Imperial units given when possible. This student friendly text demonstrates how to balance design materials process selection and economic and environmental analysis to optimize manufacturing processes for a given component. The author maintains a book website which features PowerPoint presentations for each chapter and access to a solutions manual for qualifying instructors. Professor Faraq's book website
