Metaphysics Of Infinity The Problem Of Motion And The Infinite Brain:

Metaphysics of Infinity Ion G. Soteropoulos, 2013 Since the time of the Greek philosopher Zeno fifth century BCE our faculty of analytic understanding has failed to comprehend motion through the ages The reason is the paradox or contradiction associated with motion One fundamental contradiction is the conflict between the finite body and the infinite divisibility of the unit distance ab Indeed how is it possible to move from a to b if we must first pass through an infinite series of sub distances in one instant How can we traverse an unlimited series a series without limit yet reach its limit Because the heart of the problem is the conflict between the finite and the infinite its solution depends on reconciling this contradiction and transforming this reconciliation into the founding principle of motion Having accomplished these two things this work investigates the sweeping consequences they have regarding the geometric form of the physical universe the Aristotelian ontology of the physical body the nature of our finite brain the finite analytic paradigm of empirical science and the meaning of our technological acceleration This book will appeal to a wide range of readers with interests in the logical mechanics of the physical universe the hidden powers of our finite brain and the utility of robots in the future Although some of the presentation requires the understanding of elementary mathematical equations the argument is conducted at the deepest level that of principles This approach enables readers to follow the book s reasoning without technical training on the subject For more information please visit the author s website apeironcentre.org Please visit the Apeiron Centre Youtube channel [here](#)

Eco-Phenomenology: Life, Human Life, Post-Human Life in the Harmony of the Cosmos William S.

Smith, Jadwiga S. Smith, Daniela Verducci, 2018-07-03 This volume presents discussions on a wide range of topics focused on eco phenomenology and the interdisciplinary investigation of contemporary environmental thought Starting out with a Tymieniecka Memorial chapter the book continues with papers on the foundations theories readings and philosophical sources of eco phenomenology In addition it examines issues of phenomenological anthropology ecological perspectives of the human relationship to nature and phenomenology of the living body and the virtual body Furthermore the volume engages in a dialogue with contemporary behavioral sciences on topics such as eco alienation sustainability and the human relationship to the earth in the context of the cosmos

Unity: The Art and Science of Transformational Change Erik Phillips-Nania, 2014-12-26 Unity is about transformational changes on the horizon that could bring about a Golden Age of peace and prosperity an idea that unites the prophecies of ancient civilizations Beginning with the new vegan healthcare standard recommended by the largest health insurance company Unity describes the levels of food consciousness and comprehensive healthcare policy reform Unity then defines the development of higher consciousness and the art science and technology of Enlightenment Next the application of these contemplative studies is critical to solving the crisis of civilization for preventing catastrophic superstorms and implementing the idea of spiritual geoengineering to bring about environmental harmony The final chapter is on the application of higher consciousness to political and social revolution for the renewal of

democracy equality justice and peace [The Particle and Philosophy in Crisis](#) Anil Rajimwale,2022-10-04 This book is a novel study on the way revolutions in science technology and communication impact philosophy world outlook including Marxism society s future mode of production capitalism socialism dichotomy world economy and trends like postmodernism and post industrialism It also deals with motion of and crisis created by the new concept of the particle on human thought philosophy and worldview We ride the unprecedented scientific and technological revolution STR into the unlighted extraordinary world of quantum motions Human thought and being are shifting to and gathering speed along the time paradigm rendering dialectics increasingly crucial the book opines Electronic technology quantum discoveries and wave particle duality as a wonder of nature have changed forever the way we look at the world which stands redefined Grounds of philosophy move away creating epistemological crisis as we transit to a post classical world We now look at whole humanity from out in the space and our dialectics and contradictions acquire new meaning This self transcendence can potentially free us of existing acute contradictions Scientific literature and sources have then been creatively used in the book to take up the concepts of matter idea motion time space and dialectics It is therefore a bold attempt to negate the existing philosophy by creatively developing a new scientific world outlook *The metaphysical foundations of modern physical science* E.A.
