*Proceedings of the 7th International Conference on Economic Management and Green Development* Xiaolong Li, Chunhui Yuan, John Kent, 2024-02-26 Economics has always been a heated research topic and green development is rising and integrating with various fields for interdisciplinary studies. Initiated in 2017, the International Conference on Economic Management and Green Development (ICEMGD) is an annual conference aiming at bringing together researchers from the fields of economics, business management, public administration, and green development for the sharing of research methods and theoretical breakthroughs. The 7th International Conference on Economic Management and Green Development (ICEMGD 2023) was held on August 6, 2023. It was a hybrid conference including several on-site workshops and an online session. The workshops were held in London, Gala, Birmingham, Sydney, and Beijing. The proceedings consist of papers accepted by ICEMDG 2023, which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editing committee of the conference. The papers have a diverse range of topics situated at the intersecting fields of economic management, public administration, and green development. ICEMDG is working to provide a platform for international participants from fields like macro and microeconomics, international economics, finance, agricultural economics, health economics, business management, and marketing strategies, regional development studies, social governance, and sustainable development. This proceedings volume together with the conference looks forward to sparking inspiration and promoting collaborations. This book will be of interest to researchers, academics, professionals, and policymakers in the fields of economic management, public administration, and development studies.

*Enterprise Identity Management* Denis Royer,2013-03-12 The introduction of Enterprise Identity Management Systems

EIdMS in organizations even beyond the purely technological level is a costly and challenging endeavor. However for decision makers it seems difficult to fully understand the impacts and opportunities arising from the introduction of EIdMS. This book explores the relevant aspects for an ex ante evaluation of EIdMS. Therefore it examines this domain by employing a qualitative expert interview study to better understand the nature of EIdMS as they are situated between security and productive IT systems. To this regard the focus is put on the general nature of EIdMS projects and the constructs being relevant for analyzing such projects in the decision support phase. Based on the derived constructs and thematic topics from the interviews an explanatory model for EIdMS introductions is derived and iteratively improved and evaluated. Finally a possible application use case for the creation of adequate decision support tools is presented.
