**Changing the Grade** Jonathan Cornue, 2018-01-18 Many educators agree that the 100 point grading model is not always a reliable way to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices? In *Changing the Grade* author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards based grading system including 30 steps to guide you through the process. In addition to identifying and addressing the barriers to change such as concerns about how colleges and employers will interpret an alternative grading model, Cornue offers a concrete structure for changing the grading system providing guidance on thinking in a new way about why grades are given and the purpose of a report card grade. Identifying what needs to be changed and what actions must be taken to facilitate the change. Building a team of stakeholders including teachers, principals and guidance counselors to lead the change process. Developing the new standards based grading structure. Designing standards based assignments and assessments that align with a new grading structure. Avoiding grade inflation and getting buy in from teachers and other staff members, principals, administrators, the board of education and the community by demonstrating that the change process is intentional, research based, student focused and permanent. The book also includes helpful samples of standards based gradebooks, homework assignments, rubrics and report cards. If you are interested in making a systemic and systematic shift to a high quality grading structure that is far less subjective than many commonly found in schools, consider *Changing the Grade*.
