This book organizes the evidence for a possible answer i.e. that the problem could be one of addiction to processed foods. In a Processed Food Addiction PFA model concepts of abstinence, cue avoidance, acceptance of lapses and consequences all play a role in long term recovery. Application of these concepts could provide new tools to health professionals and significantly improve outcomes. This book describes PFA recovery concepts in detail. The material bridges the research into practical steps that health professionals can employ in their practices. It contains an evidence based chapter on concepts of abstinence from processed foods. It rigorously describes PFA pathology according to the DSM 5 Addiction Diagnostic Criteria. It applies the Addiction Severity Index to PFA so that health practitioners can orient themselves to diagnosing and assessing PFA.
