recipes help you save money and eat well this season Hungry [Good Meal Prep Ideas For Beginners and Dummies](#) Barbara Dawson, 2020-08-18 Meal prepping is making a meal or recipe then portioning it out to eat later. If you've ever had leftovers from dinner to take with you for lunch the next day, you've had a meal prepped. Generally, though, meal prepping refers to preparing 3-7 days worth of food at a time. Think of it like keeping lunches for the week later instead of eating them on the go. You can use this same technique for breakfast, lunch, dinner, and snacks. Meal prepping saves time, reduces waste, and reduces temptation to eat outside your plan. Whether the plan is a diet or a budget, when keeping a meal plan, it's good for everyone. It is a great way to save time, convenience, and money. More than ever, with meal prepping, you can eat the same thing for a few days in a row, so if you don't like leftovers or get bored with the same meal prepping for a week. If having one meal for the week maximizes your time and budget, it's more efficient to do it for a few days. It's generally seen as a meal for the week, or maybe one other person to a whole meal. Meal planning for a whole week would be quite difficult because the meal plan would require a lot of time and effort. A meal is stored in the refrigerator for a few days. It's a slow process in itself. In addition to the way food is packed, the individual nuances of your refrigerator temperature can impact the meal's quality. Refrigerated meals are often acceptable, but the texture and flavor will be affected. Always begin with the FDA guidelines for food safety. Guidelines include not leaving food out for more than four hours, storing food at a temperature between 40°F and 140°F, and using a thermometer to check the temperature of the food. Find that food that has been stored for more than four days is not safe to eat. [The Plant-Based Athlete's Guide to Meal Planning: Recipes for Peak Performance](#)
