The Voice Catchers Joseph Turow, 2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel Yet a new business sector is emerging to do exactly that The first in depth examination of the voice intelligence industry *The Voice Catchers* exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions sentiments and personality often in real time In fact many scientists believe that a person's weight height age and race not to mention any illnesses they may have can also be identified from the sound of that individual's voice Ultimately not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime [An Introduction to Online Platforms and Their Role in the Digital Transformation](#) OECD, 2019-05-13 This report contains detailed profiles of twelve of the world's leading platform companies and derives insights from those profiles about what platforms actually do how they do it and why they succeed financially **Daily Graphic** Ransford Tetteh, 2014-09-22 **Reality and Belief of Indian Military Affairs** K. K. Singh, India does not admit easily to broad generalizations It is an extraordinarily complex and diverse society and Indian elites show little evidence of having thought coherently and systematically about national strategy although this situation may now be changing Despite India's cultural greatness and longevity as a civilization Indian history is often dimly perceived and poorly recorded given an oral tradition in imparting past events and the destruction of most records much of this history is difficult to verify Until the middle of the eighteenth century Indians knew little of their national history and seemed uninterested in it Four principal factors help to explain Indian actions and views about power and security Indian geography the discovery of Indian history by Indian elites over the past 150 years Indian cultural and social structures and belief systems and the British rule Geography has imparted a view of the Indian subcontinent as a single strategic entity with various topographical features contributing to an insular perspective and a tradition of localism and particularism India's unique culture reinforced this unity and imparted first a tendency toward diversity and accommodation to existing realities and second a highly developed capacity to absorb dissimilar concepts and theories This
