Generative AI for Students David Meechan, 2024-12-07 Your essential guide to using artificial intelligence AI for study at university

Classroom Connect, 1997 *The Impact of Artificial Intelligence on Workforce Management within the Banking and Finance Industry* Sofia Papadopoulou, 2021-05-18 Master's Thesis from the year 2020 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1 6 University of applied sciences Frankfurt a M language English abstract The purpose and objective of this thesis is to examine the degree of impact WFM is facing due to implementation of AI based tools within the banking and finance industry. To do this the author will select and classify under the chapter Literature Review how in which departments and to what degree banks and other financial institutions have implemented AI tools within their organization. Secondly the author will conduct interviews with executive leaders as well as with AI researchers and experts and analyze the data received. For this study the author focuses on AI's impact on WFM within the banking and finance industry. The purpose of the following questions is to refine the present knowledge gap within the banking and finance industry regarding the WFM impact of AI. The author will emphasize via a literature review and interviews exactly how AI based technology tools have been implemented in the banking and finance industry. To do so three research questions have been chosen and will be further analyzed throughout this study paper. The first question focuses on WFM and HR teams. It predicts how many people and what kind of qualifications will be deployed. As well as where and when they will be deployed. There are many consequences of banks and other financial institutions implementing more AI technology. In his book *Competing in the Age of AI* Iansiti and Lakhani mention that it is critical for leaders to understand the choice of model along with navigating the ethics of digital scale. The author emphasizes that leaders must be able to build a strong organization of safety, security, and sustainability. Firms spend billions of dollars on new AI related technologies and innovations. Despite this banks and other financial institutions face three main issues. The first challenge is an outdated

operating model The second challenge is the lack of a fitting talent strategy Both challenges are interconnected to each other Likewise as a third challenge Workforce Management WFM the core process that boosts performance levels and competency for an organization has been reformed and disrupted by the introduction of AI

Evaluating the Effects of Artificial Intelligence on Complexity in Marketing, 2021-03-30 Bachelor Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1 9 Reutlingen University ESB Business School language English abstract The research question explored in this paper is about a potential benefit of AI in marketing which to this day is comparatively unexplored Even though the concept of AI has been around since the 1950s and current research and development make significant progress in this area scientific literature dealing with AI in marketing consists of less than 300 published articles This paper distinguishes itself from related papers as it goes beyond investigating whether AI has an impact on business or not The results of this thesis shall not only show the potential AI holds for marketing but also suggest constant theoretical exploration of untapped fields in marketing The Internet of things IoT and big data changed customer behavior and how businesses work This trend has led to a continued increase in complexity for marketing managers In 2017 8 4 billion devices were connected to the internet This number is forecasted to increase to 20 4 billion by 2020 The immense amount of data generated collected and analyzed has propelled new markets such as big data and artificial intelligence Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing Connecting dispersed data and finding patterns leads to helpful insights which are said to reduce complexity Many businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage
