Extremes Of Mobility: Development And Consequences Of Transport Policy In Los Angeles Stefan Bratzel, 2023-10-06 The development of transportation policy in Los Angeles is a history of extremes in the 1920s the city had the largest regional rail network in the world which was completely abolished 40 years later In its place a vast network of freeways was built in the metropolis with a car focused mobility pattern Los Angeles became a symbol of car oriented mobility with all the negative ecological and social side effects Since the 1990s Los Angeles has been rebuilding its public rail transport with little success so far This book examines the history of Los Angeles development and identifies the key drivers that have shaped the metropolis extreme transport policies With other cities facing similar albeit less extreme transportation issues they can learn from how Los Angeles had responded and continues to adapt to its considerable transport policy problems especially in order to avoid the mobility experiences faced by the American city But to do so it is necessary to abandon the prevailing perspective which is largely limited to evaluating transport modes road versus rail A sustainable solution to the problems of metropolitan areas will only be possible if the origins of transport with their spatial social and economic interdependencies are understood and integrated into transport policy action

#NoFly Shaun Hendy, 2019-10-24 By avoiding planes for a year I found that I had cut my carbon dioxide emissions from travel to just over 1 tonne This was a reduction of 95 per cent from my 2017 carbon footprint from travel It felt good What happens when a leading New Zealand scientist and frequent traveller rules out flying for a year From overnight buses to epic train journeys Shaun Hendy s experiences speak to our desire to do something anything in the face of growing climate anxiety NoFly confronts the hard questions of one person s attempt to adapt Was this initiative merely symbolic Did it compromise his work his life And has it left him feeling more optimistic that we can indeed reach a low emissions future

Walking for Weight Loss Lisa H Gregory Ph D, 2021-05-24 When it comes to exercise there's a very common assumption that more is better the more intense a workout is the more you must be getting from it After all have you really accomplished anything if you don't nearly black out setting a new PR in the squat rack and then almost throw up doing 2 minute AMRAP burpees in a weighted vest That kind of workout has its place but it's definitely not the only valuable kind of exercise or even the most valuable Consider that The most effective exercise is the one you'll do consistently Many people in this world find 2 minute AMRAP burpees to be nothing short of cruel and unusual if that's what

exercise means to them they won't be doing it for very long. A good workout plan is one that puts you at the lowest risk for injury. If you're constantly driving yourself to the absolute extreme of what your body can take in every single workout, you're at a very high risk of injury because you're always pushing the limit of what you can do. You don't get stronger in the gym. You get stronger when you're recovering. If you're doing extreme intensity as hard as you can go and extreme frequency every day or only 1-2 rest days per week, you're not recovering enough and eventually it's going to make you weaker, not stronger. Not everyone can do burpees and barbell squats even if they wanted to. Does that mean they should just give up on the whole idea of exercise and invest in a very comfortable couch? Heavy squats and half marathons are great, but they're not the only workouts worth doing. There are all kinds of reasons why walking and other forms of gentle exercise might be the right choice for all kinds of people. For the hard-charging fitness lovers, walking is a way to break up intense workouts with active recovery. Getting in motion helps your body recover by increasing blood and lymphatic flow around muscle tissue, but a gentle movement like walking is easy on any aching joints or pulled muscles and it won't make a problem worse. For people who don't consider the gym their second home, walking is also an ideal starter exercise. You don't need any special equipment or even a gym membership; you can do it anywhere and you can do it at almost any weight, age, or state of health. If you hate exercising, walking also makes it easy to sneak in activity while you're doing other things. Walking doesn't have to mean walking laps around a track. It might mean taking a walking tour of your city, going for a walk with a friend to talk things over for a while, taking a nature walk to see some local plants and animals, or exploring parts of your neighborhood you've never seen before.
