

# The minority rights approach

- It does not consider the existence of minorities to be a threat to political order.
- It builds on the idea that minorities who are **recognised and supported** by the state are less likely to challenge its authority or threaten its territorial integrity.
- **Positive government action** promoting diversity and mutual respect between all identities in the state.
- Preventing inter-ethnic, inter-religious conflict and the present configuration of borders. Essentially conservative perspective: preserving the *status quo*.

## **Minority Rights Between Diversity And Community:**

*Minority Rights* Jennifer Jackson Preece, 2005-12-23 The question of minority rights is one of the great dilemmas of contemporary politics Increases in the flow of immigrants migrants and refugees have raised public concerns that greater cultural and ethnic diversity creates instability within nation states But does stability really require homogeneity Or can it be maintained in the presence of different minority groups In this path breaking book Jackson Preece analyses whether traditional minority rights theory is sufficiently dynamic to inform effective responses to modern challenges The central premise behind minority rights is that groups recognized and supported by the political community are far less likely to challenge its authority or threaten its territorial integrity However as Jackson Preece shows the potential for collisions of values and interests still exists and the possibility of a permanent solution to the problem of diversity remains illusive Minority Rights will be an indispensable resource for students and scholars of political science international relations law and sociology

Mainstreaming a Minority Rights Based Approach to Refugee and Migrant Communities in Europe, 2017-12-15 The combination of the migration crisis the poor economic climate and the continued threat from terrorism has been blamed for increased hostility towards migration and migrants throughout Europe Since the beginning of the crisis with hundreds of thousands of asylum seekers and migrants attempting to enter the European Union EU by land and sea an increase in intolerance xenophobia and hate crime has been reported even in countries that have traditionally been tolerant towards migration Discrimination and hate crime towards migrants and their descendants particularly those of Muslim origin is now on the rise and this growing intolerance is also directly affecting settled communities and traditional minorities such as Jews and Roma Against this background far right populist parties are gaining increasing influence within domestic politics even in states where levels of immigration have traditionally been low Negative political narratives and media representations directly shape the public's perception of the threat posed by migration and have driven the resurgence of a strongly anti migrant politics across Europe even among centrist parties However by focusing on deterrence and the containment of migrants rather than protection and inclusion policy responses to the migration crisis have the potential to increase public perceptions of insecurity and fail to challenge the root causes of intolerance The migration crisis has brought to the fore the challenges faced by European states confronted with mass influxes of vulnerable individuals who differ from the majority population in terms of ethnicity religion or language This briefing argues that the approach adopted by the majority of European states in response to these challenges not only violates the human rights of migrants but that it inhibits successful integration and undermines societal cohesion more broadly While the need to adopt integration policies that develop cohesive societies is widely acknowledged in practice migrant integration policies do not address identity as a cause of vulnerability despite the identification of discrimination prejudice and xenophobia as a barrier to integration This publication therefore makes the case for a minority rights based approach to migrant inclusion to support the development of

diverse unified and open societies across Europe

**The Realities of Policing Diverse Communities from Minority and Police Perspectives** David J. McInerney, 2020-06-09 From the mid 1990s onwards Ireland experienced unprecedented growth levels in immigration from around the world prompted by the country's changing economic fortunes. In turn the people of a very small and conservative country saw the rapid development of diverse minorities in their midst especially in the capital Dublin. From a sociological point of view such communities posed challenges for the national police force An Garda Síochána. As part of a strategy to engage with rapidly changing demographics An Garda Síochána launched the Garda Racial and Intercultural Office (GRIO). In 2001 the author of this book was invited to establish a framework and practical measures to negotiate the non-discriminatory policing of Ireland's changing society. The author proposed the appointment of Garda Ethnic Liaison Officers (ELOs) to liaise and reassure members of these new minorities while developing the officers' own deeper understanding of difference and vulnerability. These appointed ELOs were trained in cultural awareness and difference by the author in conjunction with minority representatives which in turn influenced their thinking in the delivery of a non-discriminatory front line police service. The role of the ELO makes the Irish police authorities one of the first in the world with specialist officers dedicated to building relations with minorities. This book has many lessons to offer sociologists, academics, criminologists, lawyers, social policymakers and police institutions dealing with the plight of refugees, asylum seekers, economic migrants and marginalised people the world over.

Minority Rights in a Contemporary Dictatorship

Elzbieta Szumanska, 2010-08 Master's Thesis from the year 2010 in the subject Politics International Politics Region Eastern Europe grade 1.5 European University Viadrina Frankfurt Oder language English abstract The master thesis is related to significant problems in contemporary Europe not only from the perspective of Polish people living in Belarus but also from the international perspective. Belarus is arguably the least democratic country in Europe. As such it has posed problems for the EU and other European and Western institutions especially on the field of minority protection. Minorities are among the most contested issues in political life because they speak to an inherent tension in human affairs between competing desires for freedom and belonging. The diversity aimed by the Western political actors simply contradicts the principle that legitimates a political community in an authoritarian state. In the case of the Belarusian dictatorship it leads to enhanced conformity resulting in minority discrimination. The paper presents different kinds of the external influence in order to assess the most effective ones when defending minority rights in a dictatorship. The 1st chapter the Author presents the ways of understanding and considering the problems of minorities, minority rights, their protection as well as the relationship between minorities and dictatorship. The Author is highlighting research methods too. In the 2nd chapter Ms Szumanska concentrates on presenting the origins of dictatorship in Belarus and on how Polish minorities function there. The Author tries to examine the situation of Poles in the contemporary Belarus. The 3rd chapter gives a good overview of regulations internal, bilateral and international standards related to the treatment of minorities in Belarus. She states that practices of Belarusian authorities

towards Polish minority in Belarus is incompatible with democratic standards The 4th chapter is an attempt to present and analyze the imp **Populism, Memory and Minority Rights** Anna-Mária Bíró,2018-11-26 Populism Memory and Minority Rights is the flagship publication of the Tom Lantos Institute TLI a highly regarded international human rights institute based in Budapest Hungary The publication provides a forum for discussion on crucial themes of global and regional importance on the accommodation of ethno cultural diversity and related normative developments It introduces TLI s work in terms of its mandated issue areas including Roma rights and citizenship Jewish life and antisemitism and Hungarian and other national minorities The theoretical and empirical studies commentaries interviews reports and other documents offer a unique source of information for libraries research institutes civil society actors governments intergovernmental organizations and all those interested in contemporary normative trends and debates in international minority protection *The New Oxford*

**Diverse Communities** Barbara Arneil,2006-09-14 Diverse Communities is a critique of Robert Putnam s social capital thesis re examined from the perspective of women and cultural minorities in America over the last century Barbara Arneil argues that the idyllic communities of the past were less positive than Putnam envisions and that the current collapse in participation is better understood as change rather than decline Arneil suggests that the changes in American civil society in the last half century are not so much the result of generational change or television as the unleashing of powerful economic social and cultural forces that despite leading to division and distrust within American society also contributed to greater justice for women and cultural minorities She concludes by proposing that the lessons learned from this fuller history of American civil society provide the normative foundation to enumerate the principles of justice by which diverse communities
