**Wisdom for Positive Living** Rev. Kofi Awuku,2016-09-28 Life is a platform suitably afforded to humans for meaningful survival by their potential Since nothing happens in a vacuum the journey to meaning eventually cannot begin except when there is information pieces of information for awareness and guidance and to avoid danger and to take prospective steps This is knowledge and it is useless except when there is that energy or quality to convert it into specific results that is wisdom In a simplistic definition therefore knowledge is having information about something and wisdom is the ability to use information or knowledge to achieve desirable results in whatever respect In human existence knowledge and wisdom importantly became the sole applicable instruments for strategic living These remain the architects engineers builders and decorators of human existence by the propulsion of cognitive excellence but people have not profoundly endeared themselves to these values The default crystallizing as ignorance accounts for most of the poor and miserable survival of people Most humans will not be trapped in many unfortunate but avoidable issues of life if these priceless values

Isaiah Berlin made a now classic distinction between negative and positive conceptions of freedom In this book Yildiz Silier introduces a fresh way of looking at these conceptions and presents a new defence of the positive conception of freedom Revealing how the internal debate between various versions of negative freedom give rise to hybrid conceptions of freedom which in turn are superseded by various versions of the positive conception of freedom Silier concludes that Marx s concrete historical account of positive freedom resolves many of the key debates in this area and provides a fruitful framework to evaluate the freedoms and unfreedoms that are specific to capitalism This book examines the thought of the paradigm thinkers in this debate F A Hayek on negative freedom and T H Green on positive freedom and then ranges over the contributions to this debate made by both classical thinkers such as Kant Hegel and Marx and those involved in contemporary debates on communitarianism capitalism and self determination such as C Taylor D Miller F Oppenheim and C B Macpherson    **ASIS 2000** American Society for Information Science.
