Civil Liability for Damage Caused by Global Navigation Satellite System Dejian Kong, 2019-05-24 It has come to pass that national security economic growth and transportation safety not to mention such infrastructure as banking and electricity are severely dependent on the positioning information navigation capabilities and

time dissemination provided by Global Navigation Satellite System GNSS However GNSS is not risk free The more humanity depends on GNSS the more risks it has to face It is irresponsible to wait for an accident to happen merely to justify the need for an appropriate GNSS civil liability regime This hugely important book examines the structure of such a regime in unprecedented depth and proposes a uniform governance structure composed of an institutional framework and a legal system for GNSS with safety of life signals at its core Exploring whether the current international law including air law and space law conventions is adequate to deal with the issue of civil liability in the context of GNSS the author confronts and responds to such crucial issues as the following ensuring that parties suffering damage caused by GNSS get fair prompt and adequate compensation balancing the interests of the GNSS industry in order for it to maintain its sustainable development identifying legal gaps arising in the GNSS context and how we should move forward determining which parts of the value chain of GNSS may qualify as origins of damage and construing GNSS civil liability mainly from contractual product and general tort liability perspectives The author assesses various solutions for GNSS civil liability based on their feasibility including an institutional defence against the doctrine of sovereign immunity and recommendations on how several international organisations can work together in this endeavour He examines scholarships travaux pr paratoires conference documents and treaties as well as national legislation A hypothetical case where damage is caused by GNSS is elaborated illustrating each legal relationship and causal link In its committed urging of GNSS signal providers to improve the stability of the satellite navigation systems and its insightful recommendations on how to promote public safety this book offers a roadmap indicating a truly viable international regime of GNSS civil liability Relevant international organisations and States as well as practitioners are sure to respond positively to its unique and important analysis

Routledge Handbook of Public Aviation Law Paul Stephen Dempsey, Ram Jakhu, 2016-07-15 The Routledge Handbook of Public Aviation Law is the first book to incorporate a comprehensive analysis of Public Aviation Law principally international but also domestic law in a comparative context in a single volume International Law is pervasive in Aviation Law and is incorporated into a number of major multilateral treaties e g the Chicago Convention of 1944 for Public International Air Law This is supplemented by various Annexes promulgated by the International Civil Aviation Organization and Conventions and Protocols promulgated by States in diplomatic conferences States then implement these international obligations in domestic laws that create aviation regulatory administrations that in turn promulgate regulations Bringing together leading scholars in the field this prestigious reference work provides a comprehensive and comparative overview of Public Aviation Law It surveys the state of the discipline including contemporary and emerging areas of law regulation and public policy in air transportation Each chapter begins with an overview of the international law applicable to the subject matter followed where appropriate by a comparative examination of domestic statutes regulations and jurisprudence The objective of the book is to identify and summarize existing areas within the context of international research and to identify and highlight emerging areas Both
