Networked Data Acquisition Systems (Daq 96) - Proceedings Of The Second International Data Acquisition Workshop
Shuhei Ajimura, Masaharu Nomachi, 1997-07-15 This workshop followed the First International Conference which was hosted by Fermilab on 26-28 October 1994. That conference discussed the switch type event builder. Much intensive R D work ensued from it showing the importance of 1 data flow control and 2 high speed memory access on network adapters/drivers. Those two themes are involved in many networked data acquisition systems. Therefore Networked Data Acquisition Systems was selected as the theme of DAQ 96. It includes a wide variety of data acquisition system presentations from present and near future experiments at high energy and nuclear physics laboratories.

Air Pollution XIII C. A. Brebbia, 2005 Air Pollution XIII presents some of the latest developments in this field bringing together recent results and state of the art contributions from researchers around the world. It contains the papers presented at the 13th International Conference on Modelling Monitoring and Management of Air Pollution.

Standard Handbook of Electronic Engineering, 5th Edition Donald Christiansen, Charles Alexander, Ronald K. Jurgen, 2005 The Standard Handbook of Electronics Engineering has defined its field for over thirty years. Spun off in the 1960s from Fink's Standard Handbook of Electrical Engineering, the Christiansen book has seen its markets grow rapidly as electronic engineering and microelectronics became the growth engine of digital computing. The EE market has now undergone another seismic shift away from computing and into communications and media. The Handbook will retain much of its evergreen basic material but the key applications sections will now focus upon communications, networked media and medicine, the eventual destination of the majority of graduating EEs these days.
