**Witness Protection and Criminal Justice in Africa** Suzzie Oyakhire, 2023-06-30 This book examines the concept of witness protection which is still at an early developmental stage in several African countries including Nigeria from a legal and institutional perspective. Recent developments in Nigeria highlight the need to clarify legal and conceptual issues within the existing legal framework for protecting witnesses. Using the Nigerian case study, the book illustrates some obscurities inherent in the concept of witness protection. These are highlighted around five critical areas: the definition of witness protection, the scope of beneficiaries requiring protection, the nature of crimes necessitating protection, the nature of protective measures, and the administrative control of witness protection. Specifically, this book draws from the existing literature and practices of witness protection and adopts two distinct perspectives: the criminal justice perspectives and human rights perspectives as heuristic tools for analysing the concept and to separate the disparate influences that shape how it is construed. These distinctions are utilised throughout the book as an integrated way of conceptualising the concept of

witness protection By discussing the practice of witness protection within the Nigerian context the book contributes to African conversations on the topic of witness protection The clarifications made in this book are utilised in making normative proposals for developing a legal framework for witness protection in Nigeria They are also useful for other African countries interested in developing a witness protection framework as part of criminal justice reform This book will serve as a reference point for legal scholars researchers academics postgraduate students and policy makers interested in the concept of witness protection It would also be useful for courses concerned with comparative criminology where there is an interest in developments in the Global South Intelligent Information and Database Systems Ngoc Thanh Nguyen, Kietkul Jearanaitanakij, Ali Selamat, Bogdan Trawiński, Suphamit Chittayasothorn, 2020-03-03 The two volume set LNAI 12033 and 11034 constitutes the refereed proceedings of the 12th Asian Conference on Intelligent Information and Database Systems ACIIDS 2020 held in Phuket Thailand in March 2020 The total of 105 full papers accepted for publication in these

*Regional Development Dialogue*, 2014 An international journal focusing on third world development problems **"Code of Massachusetts regulations, 2014"**, 2014 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held

by the Social Law Library of Massachusetts as of January 2020 Irene Antonopoulos, Matt Bell, Aleksandra Čavoški, Ludivine Petetin, 2022-02-27 This book provides a multidisciplinary analysis of the impact of Brexit on British agriculture and associated areas discussing the Common Agricultural Policy and the Agriculture Act 2020. The Brexit referendum provoked new debates and questions over the future of agriculture in Britain and the potential positive and negative impacts of Brexit on both farmers and consumers. These debates as well as the ensuing proposals relevant to the Agriculture Act 2020 have exposed the multidimensional effects of Brexit when it comes to agriculture. With a focus on profitability, the rights of farmers, environmental protection as well as animal welfare, this book brings together an interdisciplinary analysis of the future of British agriculture in post Brexit Britain. More specifically it addresses the criticisms over the Common Agriculture Policy, presents an analysis of the Agriculture Act 2020 and considers suggestions for future developments. Through this analysis the book suggests a way towards the future with a positive outlook towards a competitive and sustainable agriculture that will satisfy the needs of farmers and consumers while ensuring environmental protection, animal welfare and rural development. This book will be of great interest to students and scholars of food and agricultural policy and politics, agroecology and rural development as well as policymakers involved in Britain's post Brexit environmental policy.

**Examples from Exploration** Bernhard Seubert, 2021-11-26 Scientific Essay from the year 2014 in the subject Psychology Industrial and organizational psychology grade A language English abstract Good decision making creates value for a company. The decision to drill in the right place or not has strong economic repercussions. Moreover the human approach to decision making can be flawed. Many of the common flaws in decision making are related to heuristic factors that is by human ways of thinking and drawing conclusions. These factors can negatively impact the outcomes of an exploration program. This paper gives examples of cases in which geoscientific reasoning can lead to pitfalls and explores why this is so. The paper then discusses the merits of the multiple working hypotheses MWH concept as an aid to harnessing seemingly contradictory data relating to several often mutually exclusive interpretations or scenarios. A simple method using a spreadsheet and decision tree analysis is proposed to quantify the outcomes of multiple scenarios. The method is illustrated by a subsurface example in which two possible interpretations reef versus volcano are considered. An outlook of Bayesian statistics and other methods is included.

**Labour Markets, Institutions and Inequality** Janine Berg,2015 Labour market institutions including collective bargaining the regulation of employment contracts and pension and other social protection policies are instrumental for improving the well being of workers and their families as well as societies Yet in many countries these institutions have been eroded in other countries they do not exist This edited volume examines the importance of these institutions for ensuring equitable income distribution including with empirical examples from both developed and developing countries It also analyses the connections between macroeconomic policies and inequality as well as how specific groups women migrant workers youths are affected by labour market institutions [Resource Efficiency](#) Paul Ekins,Nick Hughes,2016 Despite enormous progress in the past decades

towards improving human prosperity and well being this has come at the lasting cost of degradation of the natural environment and depletion of natural resources Meeting the needs of a growing and increasingly affluent population will require natural resource extraction to increase from 85 to 186 billion tons by 2050 This can cause irreversible environmental damage and endanger the capacity of Earth to continue to provide resources which are essential for human survival and development Analysis in the report shows that policies and initiatives to improve resource efficiency and tackle climate change can reduce global resource extraction by up to 28 per cent while also boosting the value of world economic activity by 1 per cent in 2050 against the baseline Such policy actions can also cut global greenhouse gas emissions by around 60 per cent in 2050 relative to 2015 levels This report has been produced by the UNEP s International Resource Panel in response to a request by leaders of the G7 nations in the context of efforts to promote resource efficiency as a core element of sustainable development The report conducts a rigorous survey to assess and articulate the prospects and solutions for resource efficiency It considers how more efficient use of resources can contribute to economic growth employment and development at the same time as reducing the world s use of materials energy biomass and water and the resulting environmental impacts The report documents many examples of best practices for increasing the resource efficiency of different sectors from countries around the world The challenge for policy makers is to learn from and scale up these good practices and to conceive and implement a set of transformative policies that will enable countries to reap the associated social environmental and economic benefits [Trade Policy Review](#) ,2017 [African Research & Documentation](#) ,2015

Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare's ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America's leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we've pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation's most thoughtful physicians The Digital Doctor examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive And it does so with clarity insight humor and compassion Ultimately it is a hopeful story We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with patients Sure we should have thought of this sooner But it's not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system
