Geographies of Peace and Armed Conflict Audrey Kobayashi, 2013-09-13 This collection addresses the impact of armed conflict and explores pathways to peace across the world. Topics range from geopolitics to the effects of armed conflict on the environment, resources, health, children, and transnational migration. Others explore the social processes involved in post-conflict situations and others still the lessons for achieving effective peace. The geographical concepts addressed include the notion of conflict space, landscapes of terror, the relationship between violence and justice, the conditions for peace and the dynamics of post-conflict. Methods include landscape analysis, interviews with a range of citizens, mapping and geographic information science and policy analysis. Several papers address the situation of children in conflict zones, the impact of conflict on patterns of migration, the role of gender in achieving peace, the concept of territory as a basis for conflict and for negotiation of peace as well as the economic impact of conflict. The studies cover several world regions including Africa, the Middle East, South and Southeast Asia, and eastern Europe. Busch,Joseph F. Pilat,2017-03-21 Given recent controversies over suspected WMD programs in proliferating countries there is an increasingly urgent need for effective monitoring and verification regimes the international mechanisms including on site inspections intended in part to clarify the status of WMD programs in suspected proliferators Yet the strengths and limitations of these nonproliferation and arms control mechanisms remain unclear How should these regimes best be implemented What are the technological political and other limitations to these tools What technologies and other innovations should be utilized to make these regimes most effective How should recent developments such as the 2015 Iran nuclear deal or Syria s declared renunciation and actual use of its chemical weapons influence their architecture The Politics of Weapons Inspections examines the successes failures and lessons that can be learned from WMD monitoring and verification regimes in order to help determine how best to maintain and strengthen these regimes in the future In addition to examining these regimes technological political and legal contexts Nathan E Busch and Joseph F Pilat reevaluate the track record of monitoring and verification in the historical cases of South Africa Libya and Iraq assess the prospects of using these mechanisms in verifying arms control and disarmament and apply the lessons learned from these cases to contemporary controversies over suspected or confirmed programs in North Korea Iran and Syria Finally they provide a forward looking set of policy recommendations for the future **Nuclear Weapons and International Law** Charles J. have changed US and Iranian competition since the fall of 2011 This escalation has been spurred by the creation of a series of far stronger US unilateral sanctions and the European Union's imposition of equally strong sanctions both of which affect Iran's ability to export its financial system and its overall economy **Containing Iran** Sasan Fayazmanesh,2013-11-13 Since the 1979 Revolution in Iran and the end of a close relationship between the US and the Shah successive American administrations including the Obama Administration have tried to contain Iran by various means particularly sanctions and military threats Even though President Obama came to office promising to engage Iran in reality his administration has followed the policy of tough diplomacy which has included among other acts imposing draconian sanctions against Iran Following the author's earlier book on the history of containment of Iran and Iraq the current book examines closely the Obama Administration's policy toward Iran as well as the role played by Israel the European Union and the International Atomic Energy Agency IAEA in the implementation of this policy Specifically it is argued that the policy of tough diplomacy designed mostly by those associated with the Israeli lobby groups was intended to give an ultimatum to Iran in some direct meetings telling Iran to either accept the US Israeli demands or face aggression The meetings were also intended to create the illusion of engaging Iran in order to gain international support for aggressive actions Barack Obama announced this policy in his speeches as a Senator particularly at the American Israel Public Affairs Committee policy conferences After he became president in 2008 the policy of aggressive diplomacy was put in motion While pretending to engage Iran in diplomacy the Obama Administration in coordination with the US Congress and the government of Israel pushed for the most confrontational IAEA reports on Iran and an unprecedented set of unilateral and multilateral sanctions The US and Israel also engaged in a campaign of military threats sabotage and assassination of Iranian nuclear scientists Yet after four years of hostilities the policy of tough diplomacy failed to achieve many of its goals and failed to contain Iran **The Gulf Military Balance** Anthony H. Cordesman,Robert M. Shelala,Omar Mohamed,2014-03-12 The United States faces major challenges in dealing with Iran the threat of terrorism and the tide of political instability in the Arabian Peninsula The presence of some of the world's largest reserves of oil and natural gas vital shipping lanes and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition Moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the Gulf states must address and that the United States must take into consideration when forming strategy and policy
