Pdf Ancient Maya Marketplace Archaeology Transient:

The Ancient Maya Marketplace Eleanor M. King, 2015-11-12 Trading was the favorite occupation of the Maya according to early Spanish observers such as Fray Diego de Landa 1566 Yet scholars of the Maya have long dismissed trade specifically market exchange as unimportant They argue that the Maya subsisted primarily on agriculture with long distance trade playing a minor role in a largely non commercialized economy The Ancient Maya Marketplace reviews the debate on Maya markets and offers compelling new evidence for the existence and identification of ancient marketplaces in the Maya Lowlands Its authors rethink the prevailing views about Maya economic organization and offer new perspectives They attribute the dearth of Maya market research to two factors persistent assumptions that Maya society and its rainforest environment lacked complexity and an absence of physical evidence for marketplaces a problem that plagues market research around the world Many Mayanists now agree that no site was self sufficient and that from the earliest times robust local and regional exchange existed alongside long distance trade Contributors to this volume suggest that marketplaces the physical spaces signifying the presence of a market economy did not exist for purely economic reasons but served to exchange information and create social ties as well The Ancient Maya Marketplace offers concrete links between Maya archaeology ethnohistory and contemporary cultures Its in depth review of current research will help future investigators to recognize and document marketplaces as a long standing Maya cultural practice The volume also provides detailed comparative data for premodern societies elsewhere in the world Ancient Maya Politics Simon Martin, 2020-06-18 With new readings of ancient texts Ancient Maya Politics unlocks the long enigmatic political system of the Classic Maya

Vis, 2018-09-17 Cities Made of Boundaries presents the theoretical foundation and concepts for a new social scientific urban morphological mapping method Boundary Line Type BLT Mapping Its vantage is a plea to establish a frame of reference for radically comparative urban studies positioned between geography and archaeology Based in multidisciplinary social and spatial theory a critical realist understanding of the boundaries that compose built space is operationalised by a mapping practice

utilising Geographical Information Systems GIS Benjamin N Vis gives a precise account of how BLT Mapping can be applied to detailed historical reconstructed contemporary and archaeological urban plans exemplified by sixteenth to twenty first century Winchester UK and Classic Maya Chunchucmil Mexico This account demonstrates how the functional and experiential difference between compact western and tropical dispersed cities can be explored The methodological development of Cities Made of Boundaries will appeal to readers interested in the comparative social analysis of built environments and those seeking to expand the evidence base of design options to structure urban life and development

Making It at Any Cost Matías Dewey, 2020-06-09 La Salada is South America's largest marketplace for fraudulently labeled clothing a sprawling and dangerous bazaar on the fringes of Buenos Aires where counterfeit goods are bought and sold armed thieves roam the nearby streets and corrupt police and politicians turn a blind eye to widespread unlawful behaviors Despite conditions traditionally considered inhospitable to economic growth including acute interpersonal distrust pervasive personal insecurity and rampant violence business in La Salada is booming under an established order completely detached from the state Matías Dewey dives deep into the world of La Salada to examine how market exchanges function outside the law and how agreements and norms develop in the economy for counterfeit clothing Drawing on seven months of ethnographic research and more than a hundred interviews Dewey argues that aspirations for a better future shape garment workers everyday practices from their home based sweatshops to the market stalls The book unearths a new configuration of garment production and commercialization detached from global supply chains submerged in the shadows of informality and illegality and rooted in aspiration and opportunity

Ancient Maya Commerce Scott R. Hutson, 2017-03-01 Ancient Maya Commerce presents nearly two decades of multidisciplinary research at Chunchucmil Yucatan Mexico a thriving Classic period Maya center organized around commercial exchange rather than agriculture An urban center without a king and unable to sustain agrarian independence Chunchucmil is a rare example of a Maya city in which economics not political rituals served as the engine of growth Trade was the *raison d'être* of the city itself Using a variety of evidence archaeological botanical geomorphological and soil based contributors show how the city was a major center for both short and long distance trade integrating the Guatemalan highlands the Gulf of Mexico and the interior of the northern Maya lowlands By placing Chunchucmil into the broader context of emerging research at other Maya cities the book reorients the understanding of ancient Maya economies The book is accompanied by a highly detailed digital map that reveals the dense population of the city and the hundreds of streets its inhabitants constructed to make the city navigable shifting the knowledge of urbanism among the ancient Maya Ancient Maya Commerce is a pioneering thoroughly documented case study of a premodern market center and makes a strong case for the importance of early market economies in the Maya region It will be a valuable addition to the literature for Mayanists Mesoamericanists economic anthropologists and environmental archaeologists Contributors Anthony P Andrews Traci Ardren Sheryl Luzzadder Beach Timothy Beach Chelsea Blackmore

Lohse, Fred Valdez, Jr., 2004-11-01 Much of what we currently know about the ancient Maya concerns the activities of the elites who ruled the societies and left records

of their deeds carved on the monumental buildings and sculptures that remain as silent testimony to their power and status. But what do we know of the common folk who labored to build the temple complexes and palaces and grew the food that fed all of Maya society? This pathfinding book marshals a wide array of archaeological, ethnohistorical and ethnographic evidence to offer the fullest understanding to date of the lifeways of ancient Maya commoners. Senior and emerging scholars contribute case studies that examine such aspects of commoner life as settlement patterns, household organization and subsistence practices. Their reports cover most of the Maya area and the entire time span from Preclassic to Postclassic. This broad range of data helps resolve Maya commoners from a faceless mass into individual actors who successfully adapted to their social environment and who also held primary responsibility for producing the food and many other goods on which the whole Maya society depended.

The New Archaeology And The Ancient Maya Jeremy Sabloff, 1994-11-07 **Ancient Maya Political Economies** Marilyn A. Masson, David A. Freidel, 2002 *Ancient Maya Political Economies* examines variation in systems of economic production and exchange and how these systems supported the power networks that integrated Maya society. Using models originally developed by William L. Rathje, the authors explore core periphery relations, the use of household analysis to reconstruct political economy and evidence for market development. In doing so they challenge the conventional wisdom of decentralized Maya political authority and replace it with a more complex view of the political economic foundations of Maya civilization.
