*Visual and Non-Visual Effects of Light* Agnieszka Wolska, Dariusz Sawicki, Małgorzata Tafil-Klawe, 2020-07-29. The introduction of artificial lighting extends the time of wakefulness after dark and enables work at night thus disturbing the human circadian rhythm. The understanding of the physiological mechanisms of visual and non-visual systems may be important for the development and use of proper light infrastructure and light interventions for different workplace settings especially for shift work conditions. *Visual and Non-Visual Effects of Light Working Environment and Well Being* presents the impact of lighting in the working environment on human health, well-being and visual performance. The physiological explanation of the visual and non-visual effects of light on humans which discusses the biological bases of image and non-image forming vision at the cellular level may be of particular interest to any professional in the field of medicine, physiology and biology. It is one of the intentions of this book to put forward some recommendations and examples of lighting design which take into account both the visual and non-visual effects of light on humans. These may be of particular interest to any professional in the field of lighting, occupational safety and health and interior design. What effects on health can a light overdose or light deficiency have? What is bad light? The authors of the monograph provide answers to these questions. Just as for a physicist the dual nature of light comprises an electromagnetic wave and a photon, the duality of light for a physician comprises visual and non-visual effects. Prof. Jacek Przybylski, Medical University of Warsaw. This is a unique publication in the field of lighting technology. The authors have skillfully combined both the technical and biomedical aspects involved which is unprecedented in the literature available. As a result an important study has been created for many professional groups with a significant impact on the assessment of risks associated with LED sources. Prof.

who colored in had significantly reduced anxiety compared with those who doodled where no change in anxiety was noticed. The anxiety reduction associated with coloring in could occur in several ways. It could be because a coloring in puts less stress on working memory a mental mechanism that people use to sustain attention. Ostensibly it is easier to remain focused if an activity is right in front of you b the complexity of the selection of coloring materials is sufficient to prevent people drifting off into worrying or ruminating c the process of coloring in requires focus to keep colors within the lines. Complex adult coloring books such as this one may therefore be of benefit if you are struggling with stress and or anxiety. This book focuses on a fairy world theme. The fairies in this book have found many creative solutions to make use of discarded objects including old boots kettles and other items. Each illustration gradually reveals more hidden details about magical activity within the fairy world. This book has 40 beautiful black and white illustrated pages.
