Embodiment and the Treatment of Eating Disorders Catherine Cook-Cottone, 2020-09-22. Tools for the clinician to help clients turn their bodies into resources for healing from eating disorders. Embodiment refers to the lived attunement of the inner and outer experience of self. Cognitions are aligned with the sensing and feeling body. Further in an attuned experience of self, positive embodiment is maintained by internally focused tools such as self-care practices that support physiological health, emotional well-being, and effective cognitive functioning. For those who suffer from eating disorders, this is not the case; in fact, the opposite is true. Disordered thinking, an unattuned sense of self, and negative cognitions abound. Turning this thinking around is key to client resilience and treatment successes. Catherine Cook-Cottone provides tools for clinicians working with clients to restore their healthy selves and use their bodies as a positive resource for healing and long-term health. The book goes beyond traditional treatments to talk about mindful self-care, mindful eating, yoga, and other practices designed to support self-regulation.

Museum Objects, Health and Healing Brenda Cowan, Ross Laird, Jason McKeown, 2019-10-02. *Museum Objects, Health and Healing* provides an innovative and interdisciplinary study of the relationship between objects, health, and healing. Shedding light on the primacy of the human need for relationships with objects, the book explores what kind of implications these relationships might have on the exhibition experience. Merging museum and object studies as well as psychotherapy and the psychology of well-being, the authors present a new theory entitled *Psychotherapeutic Object Dynamics*, which provides a cross-disciplinary study of the relationship between objects, health, and well-being. Drawing on primary research in museums, psychotherapeutic settings, and professional practice throughout the US, Canada, Bosnia Herzegovina, and the UK, the book provides an overview of the theory's origins, the breadth of its practical applications on a global level, and a framework for further understanding the potency of objects in exhibitions and daily life. *Museum Objects, Health and Healing* will be essential reading for academics, researchers, and postgraduate students interested in museum studies, material culture, mental health, psychotherapy, art therapies, and anthropology.
