**Climate Change across the Curriculum** Eric J. Fretz, 2015-12-24 Climate Change across the Curriculum examines ways of thinking and conveying information about climate change across university curricula and within academic disciplines. The contributors provide methods, strategies, rationales and theoretical justifications for teaching climate issues at the university level. The content of this book aims to introduce climate change to classes outside of the sciences as it will take a wide range of disciplines, broader institutional thinking and experimentation to fully engage university resources and knowledge toward the mitigation of fossil fuel consumption and adaptation to the negative consequences of climate change. Climate Change across the Curriculum encourages professors to engage salient aspects of their academic disciplines to the study of climate issues in the classroom as well as sample theories, practices and resources from a wide range of academic disciplines outside of their own areas of specialization. The contributors ask what role will higher education play in addressing environmental challenges and producing students who become professionals who accomplish work that solves these problems.

**Interactivity in E-Learning: Case Studies and Frameworks** Wang, Haomin, 2011-12-31 This book provides a comprehensive examination of interactivity combining key perspectives from communication and media studies, distributed cognition, system affordances, user control and social interaction intended for researchers working in the fields of communication and media, educational media, e learning and instructional technology. **A People's Curriculum for the Earth** Bill Bigelow, Tim Swinehart, 2014-11-14 A People's Curriculum for the Earth is a collection of articles, role plays, simulations, stories, poems and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from Rethinking Schools magazine alongside classroom friendly readings on climate change, energy, water, food and pollution as well as on people who are working to make things better. A People's Curriculum for the Earth has the breadth and depth of Rethinking Globalization: Teaching for Justice in an Unjust World, one of the most popular books we've published. At a time when it's becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see what's wrong and imagine solutions. Praise for A People's Curriculum for the Earth: To really confront the climate crisis, we need to think differently, build differently and teach differently. A People's Curriculum for the Earth is an educator's toolkit for our times. Naomi Klein, author of The Shock Doctrine and This Changes Everything: Capitalism vs the Climate. This volume is a marvelous example of justice in ALL facets of our lives: civil, social, educational, economic and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice. Gloria Ladson Billings, Kellner Family Chair in Urban Education, University of Wisconsin Madison. Bill Bigelow and Swinehart have created a critical resource for today's young people about humanity's responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe. Gregory Smith, Professor of Education, Lewis Clark College, co-author with David Sobel of Place and
