**The Reagan Administration, the Cold War, and the Transition to Democracy Promotion** Robert Pee, William Michael Schmidli, 2018-11-28 This book posits that democracy promotion played a key role in the Reagan administration's Cold War foreign policy. It analyzes the democracy initiatives launched under Reagan and the role of administration officials, neoconservatives and non-state actors such as the National Endowment for Democracy NED in shaping a new model of democracy promotion characterized by aid to foreign political movements and the spread of neoliberal economics. The book discusses the ideological, strategic and organizational aspects of US democracy promotion in the 1980s, then analyzes case studies of democracy promotion in the Soviet bloc and in US allied dictatorships in Latin America and East Asia, and finally reflects on the legacy of Reagan's democracy promotion and its influence on Clinton, Bush and Obama. Based on new research and archival documents, this book shows that the development of democracy promotion under Reagan laid the foundations for US post-Cold War foreign policy.

*Vaccine Education and Promotion* Graça S. Carvalho, Carlos Alberto De Oliveira Magalhães Júnior, 2025-05-13 Vaccination plays a crucial role in controlling and significantly eradicating many diseases. It reduces the burden of illness and saves countless lives worldwide. Vaccination is an essential tool in public health, directly impacting several Sustainable Development Goals SDGs as it contributes to better education SDG 4, healthier populations SDG 3, lower poverty SDG 1, and hunger SDG 2, and cleaner water and sanitation SDG 6. Misconceptions about vaccines can lead people to distrust vaccination effectiveness or safety. Such misconceptions are often spread through word of mouth, social media or alternative health communities. Therefore, vaccine education and promotion is crucial to inform and encourage people to vaccinate by providing accurate scientific information and implementing vaccination programs, emphasizing their benefits, safety and importance in preventing infectious diseases. This Research Topic focuses on new developments in vaccine education and promotion in several settings such as schools, workplaces and communities, as well as through traditional press media and social media. We aim to include studies of public health campaigns, school health activities, production of vaccine educational materials, community outreach and diverse communication to address concerns or misinformation about vaccines. The goal is to find ways of increasing vaccine rates and promoting public health by ensuring people make informed decisions about their health and the health of their communities. This Research Topic welcomes the submission of manuscripts focused on vaccine education and promotion that, among others, can address the following: Diverse strategies for vaccine education and promotion, including but not limited to several settings: schools, workplaces, communities, etc. and traditional press media and social media; Gender issues and health inequalities related to vaccination; Emphasis on the underlying framework, program theory, the planning, the implementation process and the evaluation of the vaccination promotion initiative; Vaccine education and promotion initiatives' impact and lessons; Active ingredients, favorable conditions and specific competencies for successful vaccine promoting initiatives.
