**The Japanese Sentence-final Particles in Talk-in-interaction** Hideki Saigo,2011 The Japanese sentence final particles ne yo and yone have proved notoriously difficult to explain and are especially challenging for second language users This book investigates the role of the particles in talk in interaction with the aim of providing a comprehensive understanding that accounts for their pragmatic properties and sequential functions and that provides a sound basis for second language pedagogy This study starts by setting up an original particle function hypothesis based on the figure ground gestalt and then tests its validity empirically with unmarked marked and native non

native talk in interaction data The analysis illustrates not only expectable but also unexpected or strategic use of particles as well as the problems posed for native speakers by non native speakers whose use of particles is idiosyncratic The study demonstrates that the proposed hypothesis is capable of accounting for all the uses of particles in the extensive and varied data set examined This book will be of interest to students and scholars in pragmatics and CA and to teachers of Japanese as a foreign language *Minna no Nihongo Japanese Grundstufe I - 2.
