Models Planned for Use in the NAPAP Integrated Assessment, 1989 *Prediction Markets* Leighton Vaughan Williams, 2011-06-16 How does one effectively aggregate disparate pieces of information that are spread among many different individuals In other words how does one best access the wisdom of the crowd Prediction markets which are essentially speculative markets created for the purpose of aggregating information and making predictions offer the answer to this question The effective use of these markets has the potential not only to help forecast future events on a national and international level but also to assist companies for example in providing improved estimates of the potential market size for a new product idea or the launch date of new products and services The markets have already been used to forecast uncertain outcomes ranging from influenza to the spread of infectious diseases to the demand for hospital services to the box office success of movies climate change vote shares and election outcomes to the probability of meeting project deadlines The insights gained also have many potentially valuable applications for public policy more generally These markets offer substantial promise as a tool of information aggregation as well as forecasting whether alone or as a supplement to other mechanisms like opinion surveys group deliberations panels of experts and focus groups Moreover they can be applied at a macroeconomic and microeconomic level to yield information that is valuable for government and commercial policy makers and which can be used for a number of social purposes This volume of original readings contributed by many of the leading experts in the field marks a significant addition to the base of knowledge about this fascinating subject area The book should be of interest to anyone looking at monetary economics economic forecasting and microeconomics *Relationships Between Atmospheric Emissions and Deposition/air Quality* Akula Venkatram, National Acid Precipitation Assessment Program (U.S.), 1990 *Natural Disasters, When Will They Reach Me?* Isuri Wijesundera, Malka N.
