Reproductive States Rickie Solinger, Mie Nakachi, 2016-01 *Science for Governing Japan's Population* Aya Homei, 2022-11-17 Twenty first century Japan is known for the world's most aged population. Faced with this challenge, Japan has been a pioneer in using science to find ways of managing a declining birth rate. *Science for Governing Japan's Population* considers the question of why these population phenomena have been seen as problematic. What roles have population experts played in turning this demographic trend into a government concern? Aya Homei examines the medico-scientific fields around the notion of population that developed in Japan from the 1860s to the 1960s, analyzing the role of the population experts in the government's effort to manage its population. She argues that the formation of population sciences in modern Japan had a symbiotic relationship with the development of the neologism population jink and with the transformation of Japan into a modern sovereign power. Through this history, Homei unpacks assumptions about links between population sovereignty and science. This title is also available as Open Access.

Development and Women's Reproductive Health in Ghana, 1920-1982 Holly Ashford, 2022-12-09 This book investigates the history of women's reproductive health in Ghana, arguing that between the 1920s and 1980s it was largely driven by discourses of development and population control rather than a concern for women's health or rights. Between the 1920s and 1980s, the choices that Ghanaian women made regarding their reproductive health were defined by development policy and practice. Spanning the colonial and immediate postcolonial periods, this book demonstrates that whilst the substance of development discourse shifted over time, principles of development continued to be used to impact and legitimise reproductive health policy and practices well after independence. The book explores Ghana's pluralist health system, the introduction of maternal and child welfare, the dominance of the Red Cross in Ghana's maternal and child health landscape, nationalist pronatalism, and global population activism. In order to understand how global iterations of development and health policy impacted ordinary lives in Ghana, the author uses evidence from multiple levels, including private papers, national archives, and records of international and transnational organisations. Providing balanced archival perspectives, the book includes extensive oral history interviews carried out with both rural Ghanaian women and traditional birth attendants, as well as with midwives, doctors, and family planning fieldworkers. This book will have an important impact on a number of historical fields, including Ghanaian history, global health history, global histories of population and family planning, and histories of development. It will be of interest to researchers and students in the history of public health, development, Africa, Ghana, and gender.

From Population Control To Reproductive Health Mohan Rao,2004 The book is timely invigorating and thought provoking and makes a well researched and very informative contribution to a critical understanding of the history of population control measures in India I am sure it will become a standard reference source for scholars and policy makers interested in social demography rights in relation to reproductive health and policies on population health and family planning Population Studies In this critical examination of India s family planning programme the author concludes that the health sector in India is influenced by ideas of eugenics and of Malthus He explains how these ideas have moulded the discipline of demography and helped to construct the family planning programme The author looks for empirical evidence on the apparent reproductive profligacy of the poor and points to history to show repeated association between population and economic and health improvement Questioning the motives behind the emphasis on reproductive health and rights he maintains that neo liberal economic policies have dealt a huge blow to ideas of the universal provision of health services
