Cyber Week Review:

Cybersecurity Governance in Latin America Carlos Solar,2023-01-01 Cybersecurity Governance in Latin America discusses how the massification of the Internet has exposed emerging democracies high tech vulnerabilities to cyber attacks and questions why states have decided to introduce policies and legislation facilitating the militarization of cyberspace Carlos Solar offers a comparative analysis using the cases of Argentina Brazil Chile Colombia Mexico and Venezuela to help navigate the changing security landscape and the growing risks found in the digital domain His analysis includes a review of civilian and military preparedness emphasizing the ongoing alliances with the world's superpowers to finally debate what are the side effects for peace and development in the Americas from the current cybersecurity rivalry between the United States and China Providing a much needed account of state technology affairs in the global south Cybersecurity Governance in Latin America challenges scholars and policymakers to rethink the protection of cyberspace to avoid unnecessarily sacrificing rights and freedoms in the name of national security

Governance in "Cyberspace": Access and Public Interest in Global Communications Klaus Grewlich, 1999-11-09

Cyberspace is the emerging invisible intangible world of electronic information and processes stored at multiple interconnected sites. The digital revolution leads to convergence of telecommunications, computer, Internet and broadcasting and to dynamic multimedia value chains. Deregulation and competition are major driving forces in the new interactive electronic environment. This volume contains normative proposals for cyber regulation including self regulation grounded on developments in the EU, US and the Far East in international organisations WTO, OECD, WIPO, ITU, in business fora, in NGOs, in the Internet community and in academic research. The multi actor government, business, civil society and multi level analysis subsidiarity pertains, e.g. to ex ante and ex post access regulation, competition, network economics, external effects, essential facilities, public interest principles, human dignity, free speech, privacy, security, development and culture, consumer protection, cryptography, domain names and copyright. Lawyers, regulators, business executives, investment bankers, diplomats and civil society representatives need shared essentials of plurilateral governance to safeguard both competition and public interest objectives at a scale congruent to cyberspace in the transition to an international law of cooperation.
