Stow, 2025 The response to the first four editions of *Patterns of World History* has been extraordinarily gratifying to those of

us involved in its development The diversity of schools that have adopted the book community colleges as well as state universities small liberal arts schools as well as large private universities suggests to us that its central premise of exploring patterns in world history is both adaptable to a variety of pedagogical environments and congenial to a wide body of instructors Indeed from the responses to the book we have received thus far we expect that the level of writing timeliness and completeness of the material and analytical approach will serve it well as the discipline of world history continues to mature These key strengths are enhanced in the fifth edition of Patterns by constructive dynamic suggestions from the broad range of students and instructors who are using the book It is widely agreed that world history is more than simply the sum of all national histories Likewise Patterns of World History Fifth Edition is more than an unbroken sequence of dates battles rulers and their activities and it is more than the study of isolated stories of change over time Rather in this textbook we endeavor to present in a clear and engaging way how world history works Instead of merely offering a narrative history of the appearance of this or that innovation we present an analysis of the process by which an innovation in one part of the world is diffused and carried to the rest of the globe Instead of focusing on the memorization of people places and events we strive to present important facts in context and draw meaningful connections analyzing whatever patterns we find and drawing conclusions where we can In short we seek to examine the interlocking mechanisms and animating forces of world history without neglecting the human agency behind them
