Getting Back to Business: Why Modern Portfolio Theory Fails Investors and How You Can Bring Common Sense to Your Portfolio Daniel Peris, 2018-07-06 Modern Portfolio Theory has failed investors A change in direction is long overdue We are in a time of enormous risk Economic growth is anemic and political risk to the capital markets is on the rise In the U S a generation of white collar baby boomers is heading into retirement with insufficient assets in their 401 k programs and industrial workers are stuck with materially underfunded pension plans Against that backdrop the investing industry's current set of practices and assumptions Modern Portfolio Theory MPT is based on a half century old formula that is

supposed to deliver the maximum amount of return for a given amount of risk The trouble is that it doesn't work very well In *Getting Back to Business* dividend investing guru Daniel Peris proposes a radical new approach radical in that it does away with MPT in favor of a more intuitive common sense approach practiced by business people in their own affairs everyday cash returns on cash investments In a profession utterly lacking a historical sensibility Peris writes One periodically needs to ask why we do things the way we do how we got here and whether perhaps there is a better way Balancing detailed historical evidence with a practitioner's real world expertise Peris asks the right questions and provides a solution that makes sense in today's challenging investing landscape
