Janz,2012-12-06 Epileptic disorders need treatment for many years or even for life and this makes a thorough understanding of the pharmacokinetics and possible hazards and side effects of the drugs used in treatment mandatory During recent decades our knowledge in this field has considerably increased not least as a result of the development of specific and sensitive methods for the determination of anti epileptic agents in biological material The clinical pharmacology of this group of drugs has been studied extensively and can today be regarded as well established This does not necessarily mean that drug treatment of epilepsy is without problems For example it has recently been shown that one of the newer anti epileptic drugs greeted with great enthusiasm by clinicians may in rare instances induce serious damage to the liver and the pancreas and seems even to have a certain teratogenic potential Clinical problems should be understood as a challenge to the experimental pharmacologist who should try to find explanations for the clinical hazards and if possible show new ways in which better drugs might be developed In recent years interest has focused on the importance of the inhibitory transmitter l aminobutyric acid GABA in the pathophysiology of epilepsy and there have been a series of attempts to find useful antiepileptic drugs among substances interfering with GABA metabolism in the CNS The Statue of Zeus at Olympia Janette McWilliam,Sonia Puttock,Tom Stevenson,2011-05-25 This book began to take shape following a conference on the Statue of Zeus at Olympia held at the University of Queensland in July 2008 In line with the main themes of the conference the book has two fundamental aims the first is to recognise the unsurpassed reputation of the Zeus in antiquity to move beyond the framework provided by the Seven Wonders of the Ancient World and to treat the famous statue in depth as befits its unique importance in ancient times the second aim is to employ a variety of interdisciplinary perspectives in the hope of capturing more accurately than before something of that unique importance The book is aimed at academic specialists in a variety of disciplines such as art archaeology history literature and cultural poetics though it is also intended to be accessible to undergraduates and certainly to research students The audience will primarily be one interested in classical antiquity but there are chapters which trace the story and influence of the Zeus through the Byzantine Renaissance and early modern periods and into more recent centuries in both the northern and southern hemispheres **Library & Information Sciences** ,1991 *ABA Journal* ,1956-12 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association Encyclopedia of Associations
