

Part A: Projectile Motion

1. A stunt skater is skating towards the edge of a cliff that is 12 meters high, with a speed of 4 meters per second. How far from the base of the cliff does the skater land? (6.25 m)
2. Right before the skater above hits the ground, what is his vertical speed? What is his horizontal speed? So what is his overall speed, and in what direction? (15.3 m/s, 4 m/s, 15.84 m/s, 75.4 deg below horizontal)
3. From the top of a 100-m cliff, a ball is thrown upwards at a 45-degree angle with a speed of 10 m/s. How long does it take for the ball to hit the ground? How far from the base of the cliff did the ball land? (5.29 s, 374 m)
4. From the top of a 30-m cliff, we want to throw the ball horizontally, and have it land into a bucket that is 20 meters from the base of the cliff on the ground. With what speed should we throw the ball? (8.08 m/s)
5. Lisa runs across the platform at 1.8 m/s, dives out horizontally, and hits the water 3 seconds later. How high was the platform? how far out into the pool did she dive? At what angle did she enter the pool? (To find this angle, you need to find the direction of the velocity vector, not the displacement vector. Ask if that's not clear.) (44.1 m, 5.4 m, 86.5 deg below the horizontal. NOT 83 deg)
6. A ball is thrown horizontally from the roof of a 45-meter building and lands 34 meters from the base. How fast was the ball thrown? (7.92 m/s)
7. Carli Lloyd kicked a soccer ball at a speed of 40 MPH (18 m/s) at an angle of 35 degrees to the horizontal. How long does the ball stay in the air? How far did the ball travel downfield? (2.1 sec, 31.1 m)
8. A projectile is fired from the ground with a speed of 62 m/s at an angle of 34 degrees above the horizontal. Determine the maximum height achieved by the projectile, the total time it spends in the air, and the total horizontal distance (range). (61.3 m, 7.07 s, 363.68 m). NOTE you can use the "range formula" $x = \frac{v_i^2}{g} \sin 2\theta$ but be careful.
9. The pilot of an airplane traveling horizontally at 100 m/s with an elevation of 160 m wants to drop supplies to inhabitants on the island below. The pilot must obviously release the supplies before he's directly over the island...how far in front of the island would be the correct location to drop the supplies so they hit the island? (571 m)
10. Carli Lloyd scored a half-field goal (53 m) vs. Japan with a beautiful projectile motion. It looks from the video that the ball was in the air for 2.0 seconds. What was the angle of the ball when it left her foot? (20.3 deg)

Njit Phys Lab Manual

Julia Schneider

Njit Phys Lab Manual:

Uncover the mysteries within is enigmatic creation, Embark on a Mystery with **Njit Phys Lab Manual** . This downloadable ebook, shrouded in suspense, is available in a PDF format (PDF Size: *). Dive into a world of uncertainty and anticipation. Download now to unravel the secrets hidden within the pages.
