

6.0L DIT Power Stroke Diesel Engine Oil Change Guide

For 2003.5 M.Y. and later F-250 through F-550 and Excursion with the 6.0L DIT Power Stroke Diesel Engine

LOCATIONS

- ① Re-usable oil filter cap
- ② Oil fill port
- ③ Oil check dipstick

1. Make sure the vehicle is on level ground.
2. Turn the engine off and wait a few minutes for the oil to drain into the oil pan.
3. Set the parking brake and ensure the gearshift is securely batched in P (Park) (automatic transmission) or 1st (First gear) (manual transmission).
Important: To avoid engine damage, change the oil filter before draining the oil pan. This allows dirty oil in the filter housing to drain back into the oil pan.
4. Loosen the oil filter cap by using a 36mm socket and a ratchet (location #1).

NOTE: Unscrewing the cap opens the oil filter drain and drains the oil from the oil filter housing into the crankcase.

5. Remove the cap with the oil filter and O-ring attached. Turn the cap and filter upside down so as not to drip oil.

6. Using oil-resistant gloves, detach the oil filter and O-ring from the re-usable cap and dispose of properly.

NOTE: Do not handle a hot oil filter with bare hands. Continuous contact with USED motor oil has caused cancer in laboratory mice. Protect your skin by washing with soap and water.
