

The International Classification of Diseases, 10th Edition, Clinical Modification/Procedure Coding System (ICD-10-CM/PCS) will enhance accurate payment for services rendered and facilitate evaluation of medical processes and outcomes. A number of other countries have already moved to ICD-10, including:

- United Kingdom (1992)
- France (1997)
- Australia (1998)
- Germany (2000)
- Canada (2001)

The new classification system provides significant improvements through greater detailed information and the ability to expand in order to capture additional advancements in clinical medicine. ICD-10-CM/PCS consists of two parts:

- ICD-10-CM - The diagnosis classification system developed by the Centers for Disease Control and Prevention for use in all U.S. health care treatment settings. Diagnosis coding under this system uses a different number of digits and some other changes, but the format is very much the same as ICD-9-CM.
- ICD-10-PCS - The procedure classification system developed by the Centers for Medicare & Medicaid Services (CMS) for use in the U.S. for inpatient hospital settings (OPHY). The new procedure coding system uses 7 digits or numeric digits, while the ICD-9-CM coding system uses 3 or 4 numeric digits. The current system, International Classification of Diseases, 9th Edition, Clinical Modification (ICD-9-CM), does not provide the necessary detail on either patients' medical conditions or on procedures performed on hospitalized patients. ICD-9-CM is 30 years old, has outdated and obsolete terminology, uses outdated codes that produce inaccurate and limited data, and is inconsistent with current medical practice. It cannot accurately describe the diagnoses and inpatient procedures of care delivered in the 21st century.

## ICD-10-CM Diagnosis Codes

The International Classification of Diseases, 10th Edition, Clinical Modification/Procedure Coding System (ICD-10-CM/PCS) will enhance accurate payment for services rendered and facilitate evaluation of medical processes and outcomes.

The new classification system provides significant improvements through greater detailed information and the ability to expand in order to capture additional advancements in clinical medicine.

ICD-10-CM - The diagnosis classification system developed by the Centers for Disease Control and Prevention for use in all U.S. health care treatment settings. Diagnosis coding under this system uses a different number of digits and some other changes, but the format is very much the same as ICD-9-CM.

The U.S. Department of Health and Human Services (HHS) has mandated industry-wide adoption of ICD-10-CM and ICD-10-PCS code sets by Oct. 1, 2013. ICD-10-CM/PCS will affect all components of the healthcare industry. Ambulatory surgery centers (ASCs) will not be affected by ICD-10-PCS unless they are utilizing ICD-9-CM volume 3 for inpatient procedures.

The two major changes in the ICD-9-CM to ICD-10-CM code sets are structure and detail. The codes will move from a numeric five-character code to an alphanumeric seven-character code. At current count, there are approximately 17,000 ICD-9-CM codes and the possibility of 115,000 ICD-10-CM/PCS codes. The codes are far more specific which will allow for greater accuracy.

Speedy Publishing, 2014-05-04 When you are studying something as intricate, involved and structured as medical coding, it's worth your time to invest in every study aid you can possibly employ to that end. Since studying is just a way of working to ensure that you can better retain and recall information, a pamphlet is a great way to help you quickly decode various medical codes. While a deck of flash cards may seem useful, using them for a practice such as deciphering medical coding means that you will need a very thick stack. A pamphlet form study guide takes less space and similar information.
