This book is an excellent guide for either trainee or newly qualified pharmacists. It covers most ailments which may be encountered on a daily basis in the community pharmacy and describes features of more serious underlying disease to aid diagnosis or referral. It is well presented and clearly laid out with separate chapters for each ailment. At the end of each chapter are example case studies giving in summary both the view of a pharmacist and medical doctor for each condition. My only criticism is that there are no illustrations or diagrams which I feel would have been helpful when describing clinical features of some conditions. Nonetheless, there are clear descriptions of each ailment highlighting symptoms, possible causes, and most appropriate treatments. Importantly, it gives clear guidelines on when to refer presenting ailments to a doctor. It is comparable in style to the title *Minor Illness or Major Disease* however this title is illustrated with photographs of illness to aid recognition. A useful guide for all student pharmacists, preregistration pharmacists, and possibly newly qualified pharmacists. A Manual of Microscopic Mounting, with notes on the collection and examination of objects ... Illustrations drawn by the author John Henry Martin, 1872
