Koolish,1983 Moody's Bank and Finance Manual ,1991 International Conference on Advancements of Medicine and Health Care through Technology: 23 - 26 September 2009 Cluj-Napoca, Romania Simona Vlad,Radu V. Ciupa,Anca I. Nicu,2010-02-01 Projections for advances in medical and biological technology will transform medical care and treatment This in great part is due to the result of the interaction and collaboration between medical sciences and engineering These advances will result in substantial progress in

health care and in the quality of life of the population. Frequently however the implications of technologies in terms of increasing recurrent costs, additional required support services, change in medical practice and training needs are underestimated. As a result the widespread irrational use of technologies leads to a wastage of scarce resources and weakens health systems performance. To avoid such problems a systematic and effective Health Technology System must be developed and introduced, requiring the support and commitment of decision makers of all levels of the health system. The MediTech2009 conference aims to provide a special opportunity for the Romanian professionals involved in basic research, R & D, industry and medical applications to exchange their know-how and build up collaboration in one of the most human fields of science and techniques. The conference is intended to be an international forum for researchers and practitioners interested in the advance in and applications of biomedical engineering to exchange the latest research results and ideas in the areas covered by the topics and not only. We believe the reader will find the proceedings an impressive document of progress to date in this rapidly changing field.
