Ranil Wickramasinghe, Ana-Maria Sastre, 2023-12-22 The third edition of the Handbook of Membrane Separations Chemical Pharmaceutical Food and Biotechnological Applications provides a comprehensive discussion of membrane applications Fully updated to include the latest advancements in membrane science and technology it is a one of its kind overview of the existing literature This fully illustrated handbook is written by experts and professionals in membrane applications from around the world Key Features Includes entirely new chapters on organic solvent resistant nanofiltration membrane condensers membrane reactors in hydrogen production membrane materials for haemodialysis and integrated membrane distillation Covers the full spectrum of membrane technology and its advancements Explores membrane applications in a range of fields from biotechnological and food processing to industrial waste management and environmental engineering This book will appeal to both newcomers to membrane science as well as engineers and scientists looking to expand their knowledge on upcoming advancements in the field

**Membrane Reactor Engineering** Angelo Basile, Marcello De Falco, Gabriele Centi, Gaetano Iaquaniello, 2016-09-19

Uniquely focussed on the engineering aspects of membrane reactors Provides tools for analysis with specific regard to sustainability Applications include water treatment wastewater recycling desalination biorefineries agro food production Membrane reactors can bring energy saving reduced environmental impact and lower operating costs

**Membranes for Membrane Reactors** Angelo Basile, Fausto Gallucci, 2010-12-20 A membrane reactor is a device for simultaneously performing a reaction and a membrane based separation in the same physical device Therefore the membrane not only plays the role of a separator but also takes place in the reaction itself This text covers in detail the preparation and characterisation of all types of membranes used in membranes reactors Each membrane synthesis process used by membranologists is explained by well known scientists in their specific research field The book opens with an exhaustive review and introduction to membrane reactors introducing the recent advances in this field The following chapters concern the preparation of both organic and inorganic and in both cases a deep analysis of all the techniques used to prepare

membrane are presented and discussed A brief historical introduction for each technique is also included followed by a complete description of the technique as well as the main results presented in the international specialized literature In order to give to the reader a summary look to the overall work a conclusive chapter is included for collecting all the information presented in the previous chapters Key features Fills a gap in the market for a scientific book describing the preparation and characterization of all the kind of membranes used in membrane reactors Discusses an important topic there is increasing emphasis on membranes in general due to their use as energy efficient separation tools and the green chemistry opportunities they offer Includes a review about membrane reactors several chapters concerning the preparation organic inorganic dense porous and composite membranes and a conclusion with a comparison among the different membrane preparation techniques Micro/Nano Science and Engineering Y. Al-Douri,2014-04-17 Selected peer reviewed papers from the Joint International Conference on Nanoscience Engineering and Management BOND21 August 19 21 2013 Penang Malaysia **Handbook of Membrane Reactors** Angelo Basile,2013-02-08 Membrane reactors are increasingly replacing conventional separation process and conversion technologies across a wide range of applications Exploiting advanced membrane materials they offer enhanced efficiency are very adaptable and have great economic potential There has therefore been increasing interest in membrane reactors from both the scientific and industrial communities stimulating research and development The two volumes of the Handbook of membrane reactors draw on this research to provide an authoritative review of this important field Volume 1 explores fundamental materials science design and optimisation beginning with a review of polymeric dense metallic and composite membranes for membrane reactors in part one Polymeric and nanocomposite membranes for membrane reactors inorganic membrane reactors for hydrogen production palladium based composite membranes and alternatives to palladium based membranes for hydrogen separation in membrane reactors are all discussed Part two goes on to investigate zeolite ceramic and carbon membranes and catalysts for membrane reactors in more depth Finally part three explores membrane reactor modelling simulation and optimisation including the use of mathematical modelling computational fluid dynamics artificial neural networks and non equilibrium thermodynamics to analyse varied aspects of membrane reactor design and production enhancement With its distinguished editor and international team of expert contributors the two volumes of the Handbook of membrane reactors provide an authoritative guide for membrane reactor researchers and materials scientists chemical and biochemical manufacturers industrial separations and process engineers and academics in this field Considers polymeric dense metallic and composite membranes for membrane reactors Discusses ceramic and carbon for membrane reactors in detail Reactor modelling simulation and optimisation is also discussed Desalination Jane Kucera,2014-02-04 This is the first volume to cover desalination in such depth and detail offering engineers technicians and operators full coverage of the applications economics and expectations of what will certainly become one of the most important water related processes on the planet Covering thermal processes and

membrane processes this is the only volume any engineer working in desalination must have covering both practical and theoretical issues encountered on a daily basis Certain to be an important contribution to the water management community
