Michael A McDevitt

Memo June 2014 Grade 12 Science:

Caught in the Act Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education The book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers *Crimea, Global Rivalry, and the Vengeance of History* Hall Gardner, 2016-04-30 Gardner examines the causes and consequences of Russia's annexation of Crimea By analyzing alliance formations and the consequences of other annexations in world history the book urges an alternative US NATO European Japanese strategy toward both Russia and China in the effort to prevent a renewed arms race if not global war Professional Journal of the United States Army, 2016 Mental Imagery in Clinical Disorders David G. Pearson, Julie Krans, 2017-08-29 Mental imagery refers to the mental simulation or recreation of perceptual experience across different sensory modalities The exploration of mental imagery represents a new and important area within clinical psychology but arguably one still in its infancy While mental imagery has featured prominently in recent theoretical accounts of disorders as diverse as post traumatic stress disorder phobia body dysmorphic disorder mood disorders and psychosis there remains an insufficiently strong theoretical and methodological foundation to enable comparison of the role of imagery across such different disorders The current research topic presents a diverse range of cutting edge papers focusing on investigating the underlying mechanisms and or treatment interventions associated with mental imagery in clinical disorders with the goal of helping establish those common elements most clinically relevant when investigating mental imagery The research topic comprises fifteen articles drawn from the fields of psychiatry psychology and neuroscience This is a unique collection of articles that combine different perspectives from the field of clinical psychology with more diverse perspectives drawn from the wider literature on mental imagery The original research studies and theoretical articles presented are organised around four main chapters that cover imagery and eye movements imagery and craving imagery and autobiographical memory and imagery and clinical disorders We believe that the range of submissions presented in the research topic make a strong contribution to helping establish a theoretical and methodological foundation that can enable the effective study of imagery across different disorders and domains *US-Chinese Strategic Triangles* S. Mahmud Ali, 2017-06-07 This book reveals the nature of Sino US strategic competition by examining the influence exerted by major secondary stakeholders e g Japan Russia India the Koreas and ASEAN on the two powers USA and

its rival China who consider each other as a source of greatest challenges to their respective interests By adopting strategic triangles as the analytical framework and assessing triangular relational dynamics such as US China Japan or US China Russia the author illustrates how secondary stakeholders advance their own interests by exploiting their respective linkages to the two rivals thereby shaping Sino US competitive dynamics This work adds a regional and multivariable perspective to the understanding of the Indo Pacific's insecurity challenges

Dream Hoarders Richard V. Reeves, 2017-05-23 *Dream Hoarders* sparked a national conversation on the dangerous separation between the upper middle class and everyone else Now in paperback and newly updated for the age of Trump Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America In America everyone knows that the top 1 percent are the villains The rest of us the 99 percent we are the good guys Not so argues Reeves The real class divide is not between the upper class and the upper middle class it is between the upper middle class and everyone else The separation of the upper middle class from everyone else is both economic and social and the practice of opportunity hoarding gaining exclusive access to scarce resources is especially prevalent among parents who want to perpetuate privilege to the benefit of their children While many families believe this is just good parenting it is actually hurting others by reducing their chances of securing these opportunities There is a glass floor created for each affluent child helped by his or her wealthy stable family That glass floor is a glass ceiling for another child Throughout *Dream Hoarders* Reeves explores the creation and perpetuation of opportunity hoarding and what should be done to stop it including controversial solutions such as ending legacy admissions to school He offers specific steps toward reducing inequality and asks the upper middle class to pay for it Convinced of their merit members of the upper middle class believe they are entitled to those tax breaks and hoarded opportunities After all they aren't the 1 percent The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America In *Dream Hoarders* Reeves argues that in many ways they are worse and that changes in policy and social conscience are the only way to fix the broken system

China as a Twenty-First Century Naval Power Michael A McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People's Liberation Army PLA perfectly clear there is no mystery what he wants first that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China's navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi's two objectives China's reliance on foreign trade and overseas interests such as China's Belt and Road strategy In turn this has created concerns within the senior levels of China's military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China's sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details

how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy s role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America s first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China s campaign plan aimed at keeping reinforcing U S forces at arm s length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi s vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

Journal of the Society of Arts, 1880 **The Creativity Choice** Dr. Zorana Ivcevic Pringle, 2025-05-06 A groundbreaking Marc Brackett correction to the myth that creativity is a trait that you re born with instead a Yale scientist proves creativity is a decision that you make again and again Anyone who has ever participated in a brainstorming session will know that most of us do not lack ideas Yet many people never breathe life into these ideas To turn inspiration into real achievement you must decide to act and then decide to act again and again despite obstacles until your thoughts take shape and come to life This is what psychologist Zorana Ivcevic Pringle calls the creativity choice Drawing on decades of research into the science of creativity The Creativity Choice teaches readers how to bring ideas out of your mind and into the world With stories ranging from an entrepreneur who built a national nonprofit to a YouTuber who turned a hobby into a professional career to a business leader who established a company culture of innovation Pringle illuminates how people make creative ideas happen She shows what it takes to get started the psychological and emotional tools needed to navigate the creative process and the social conditions that allow creativity to succeed Through this book you ll learn how to bridge the gap between having the first spark of an idea and actually doing something with it
