Del Casino Jr., Natalie Marie Gulrud, Sarah Barns, 2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans

are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore A Comprehensive Approach on Sentiment Analysis & Prediction Manu Banga,2023-01-23 Document in the subject Computer Sciences Artificial Intelligence language English abstract In today scenario there is abrupt usage of microblogging sites such as Twitter for sharing of feelings and emotions towards any current hot topic any product services or any event Such opinionated data needs to be leveraged effectively to get valuable insight from that data This research work focused on designing a comprehensive feature based Twitter Sentiment Analysis TSA framework using the supervised machine learning approach with integrated sophisticated negation handling approach and knowledge based Tweet Normalization System TNS We generated three real time twitter datasets using search operators such as Demonetization Lockdown and 9pm9minutes and also used one publically available benchmark dataset SemEval 2013 to assess the viability of our comprehensive feature based twitter sentiment analysis system on tweets We leveraged varieties of features such as lexicon based features pos based morphological ngrams negation and cluster based features to ascertain which classifier works well with which feature group We employed three state of the art classifiers including Support Vector Machine SVM Decision Tree Classifier DTC and Naive Bayesian NB for our twitter sentiment analysis framework We observed SVM to be the best performing classifier across all the twitter datasets except 9pm9minutes DTC turned out to be the best for this dataset Moreover our SVM model trained on the SemEval 2013 training dataset outperformed the winning team NRC Canada of SemEval 2013 task 2 in terms of macro averaged F1 score averaged on positive and negative classes only Though state of the art twitter sentiment analysis systems reported significant performance it is still challenging to deal with some critical aspects such as negation and tweet normalization

The professional programmer's Deitel guide to iPhone and iPad app development using iOS 8 Swift™ Xcode 6 and Cocoa Touch. This book presents leading edge computing technologies for professional software developers. At the heart of the book is the Deitel app driven approach, a variant of Deitel's live code approach; concepts are presented in the context of complete working iOS apps rather than using code snippets. The introduction and app test drives at the beginning of each chapter show one or more sample executions. The book's source code is available at [www.deitel.com/books/iOS8FP1](http://www.deitel.com/books/iOS8FP1). You'll quickly learn everything you need to start building iOS 8 apps, beginning with a test drive of the Tip Calculator app in Chapter 1, then building your first apps in Chapter 2 with visual programming and in Chapter 3 with Swift. By the time you reach Chapter 9, you'll be ready to create your own apps for submission to the App Store. We'll overview the submission process, including uploading your apps, deciding whether to sell your apps or offer them for free, and marketing them using in-app advertising, social media, Internet public relations and more. **The Illustrated review** Illustrated review, 1871
