**Clinical Psychiatry in Imperial Germany** Eric J.

Engstrom,2018-07-05 The psychiatric profession in Germany changed radically from the mid nineteenth century to the beginning of World War I In a book that demonstrates his extensive archival knowledge and an impressive command of the primary literature Eric J Engstrom investigates the history of university psychiatric clinics in Imperial Germany from 1867 to 1914 emphasizing the clinical practices and professional debates surrounding the development of these institutions and their impact on the course of German psychiatry The rise of university psychiatric clinics reflects Engstrom tells us a shift not only in asylum culture but also in the ways in which social political and economic issues deeply influenced the practice of psychiatry Equally convincing is Engstrom s argument that psychiatrists were responding to and working to shape the rapidly changing perceptions of madness in Imperial Germany In a series of case studies the book focuses on a number of important clinical spaces such as the laboratory the ward the lecture hall and the polyclinic Engstrom argues that within these spaces clinics developed their own disciplinary economies and that their emergence was inseparably intertwined with jurisdictional contests between competing scientific administrative didactic and sociopolitical agendas

**Making the Case** Robert Leventhal,2019-11-18 One hundred years before Freud s striking psychoanalytic case histories the narrative psychological case history emerged in the second half of the eighteenth century in Germany as an epistemic genre Gianna Pomata that cut across the disciplines of medicine philosophy law psychology anthropology and literature It differed significantly from its predecessors in theology jurisprudence and medicine Rather than subsuming the individual under an established classification moral precept category or type the narrative psychological case history endeavored to articulate the individual in its very individuality thereby constructing a self in its irreducible singularity The presentation and analysis of several significant psychological case histories their theory and practice as well as the controversies surrounding their utility validity and function for an envisioned science of the soul constitutes the core of the book Close and distant F Moretti readings of key texts and figures in the discussion regarding empirical psychology psychologia empirica experiential psychology Erfahrungsseelenkunde and medical psychology medizinische Psychologie such as Christian Wolff J C Kr ger J C Bolton Ernst Nicolai J A Unzer J G Sulzer J G Herder Friedrich Schiller Jacob Friedrich Abel Marcus Herz Karl Philipp Moritz J C Reil Ernst Platner and Immanuel Kant provide the disciplinary historical scientific context within which this genre comes to the fore As the first systematic argument concerning the early history of this genre my thesis is that the psychological case history evolved as part of a pastoral apparatus of care concern guidance and direction for what it fashioned as the unique

individual as the discursive medium in a process by which the soul became a self The narrative psychological case history was in fact a meta genre that transcended traditional boundaries of history and fiction medicine and philosophy psychology and anthropology and sought for the first time to explicitly link the experience history memory fantasy previous trauma or suffering of a unique individual to illness deviance aberration and crime In a word it demonstrated as Freud later said of his own case histories in *Studies on Hysteria* the intimate relation between the history of suffering and the symptoms of illness die innige Beziehung zwischen Leidensgeschichte und Krankheitssymptome This genre not only had a profound and far reaching effect on the evolution of German and European literature one thinks of the rich traditions of the Novella and the Fallgeschichte from Goethe B chner R L Stevenson Edgar Allen Poe and Chekhov to Kafka and beyond but in shaping modern literature the clinical sciences and even popular culture The book should therefore be of interest not merely to Germanists modern European cultural historians historians of science and literary historians but also those interested in the history of medicine and psychology the origins of psychoanalysis the history of anthropology cultural studies and more generally the history of ideas

**The Making of a Policeman** Haia Shpayer-Makov, 2002 The Making of a Policeman traces the process of consolidation of the Metropolitan Police of London from the establishment of the force in 1829 to the First World War Not only was this the largest force in the country policing the biggest city in Europe and the hub of an expanding empire it was also one of the largest work organisations of any kind It is from this new perspective of the history of work that this book analyses the Metropolitan Police as a labour force It provides a unique view of an institution that had a profound impact on numerous areas of British life The Metropolitan Police represented a distinct pattern of employment within the changing world of work in Victorian and Edwardian Britain Adopting long term strategies for the recruitment of workers and their conditions of service the force was a precursor for many future employment policies The study of the Metropolitan Police therefore sheds new light on the evolution of modern employment strategies in Britain and is highly revealing of the role of the state as an employer in this period of radical changes in state power and responsibilities      Chemical Heritage ,1993      **Dictionary**
