Ticket Scalping Kerry Segrave, 2006-11-15 Ticket scalping is as much an American staple as apple pie Beginning as early as the mid 1800s scalpers known as sidewalk men were charging all the traffic would bear for event tickets Although these speculators were generally viewed as pariahs and public opinion was against the practice legal attempts to limit their activities were far from successful Boston enacted laws as early as 1873 while Pennsylvania followed suit in 1884 Still such measures did little good since some laws were declared unconstitutional and for the ones that were upheld the fines were negligible with jail time rarely served Over the years as moral objections to scalping dimmed the public became more tolerant as the practice became increasingly prevalent By the 1990s the capitalist mantras of free market and economic principles of supply and demand were even being used to justify the practice This volume details the ways in which scalping has changed over the years from a one man business to an agency controlled enterprise from performances by Jenny Lind to Billy Joel The book examines the general situation public opinion and legal perception of scalping for four distinct periods 1850 1899 1900 1917 1918 1949 and 1950 2005 Emphasis is placed on the ways in which public and legal perception of the practice has evolved over this period Scalping slowly gaining a more positive status has become more accepted as part of the economic practice of free markets

Expert One-on-One J2EE Design and Development Rod Johnson, 2004-08-04 What is this book about The results of using J2EE in practice are often disappointing applications are often slow unduly complex and take too long to develop Rod Johnson believes that the problem lies not in J2EE itself but in that it is often used badly Many J2EE publications advocate approaches that while fine in theory often fail in reality or deliver no real business value Expert One on One J2EE Design and Development aims to demystify J2EE development Using a practical focus it shows how to use J2EE technologies to reduce rather than increase complexity Rod draws on his experience of designing successful high volume J2EE applications and salvaging failing projects as well as intimate knowledge of the J2EE specifications to offer a real world how to guide on how you too can make J2EE work in practice It will help you to solve common problems with J2EE and avoid the expensive mistakes often made in J2EE projects It will guide you through the complexity of the J2EE services and APIs to enable you to build the simplest possible solution on time and on budget Rod takes a practical pragmatic approach questioning J2EE orthodoxy where it has failed to deliver results in practice and instead suggesting effective proven approaches What does this book cover In this book you will learn When to use a distributed architecture When and how to

use EJB How to develop an efficient data access strategy How to design a clean and maintainable web interface How to design J2EE applications for performance Who is this book for This book would be of value to most enterprise developers Although some of the discussion for example on performance and scalability would be most relevant to architects and lead developers the practical focus would make it useful to anyone with some familiarity with J2EE Because of the complete design deployment coverage a less advanced developer could work through the book along with a more introductory text and successfully build and understand the sample application This comprehensive coverage would also be useful to developers in smaller organisations who might be called upon to fill several normally distinct roles What is special about this book Wondering what differentiates this book from others like it in the market Take a look It does not just discuss technology but stress its practical application The book is driven from the need to solve common tasks rather than by the elements of J2EE It discusses risks in J2EE development It takes the reader through the entire design development and build process of a non trivial application This wouldn't be compressed into one or two chapters like the Java Pet Store but would be a realistic example comparable to the complexity of applications readers would need to build At each point in the design alternative choices would be discussed This would be important both where there's a real problem with the obvious alternative and where the obvious alternatives are perhaps equally valid It emphasizes the use of OO design and design patterns in J2EE without becoming a theoretical book Life John Ames Mitchell,1896 The Exhibitor ,1932 Some issues include separately paged sections Better management Physical theatre extra profits Review Servisection **Billboard** ,2002-09-14 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Various Census of India** ,1886 **ISearch-- Speech Communication** Terrence Doyle,Linda Robinson Barr,2003 **Exhibitors Daily Review** ,1933 **The Ultimate Baseball Road Trip, 2nd** Josh Pahigian,Kevin O'Connell,2012-03-27 The most entertaining and comprehensive guide to every baseball fan's dream road trip including every new ballpark since the 2004 edition revised and completely updated Parking ,1955 Making it in Cable TV Joshua Sapan,1984 **Motion Picture Herald** ,1939 **TV Guide** ,1980 **The Writer** ,1887 The oldest magazine for literary workers The Film Weekly ,1962 Broadcasting ,1964 Cable Television Business ,1984-07
