Ten Cheap Lessons: Easy, Engaging Ideas for Every Secondary Classroom Tom DeRosa, 2008-01-22 Ten Cheap Lessons is not your ordinary teacher resource book. If you're tired of compilations of meaningless worksheets and boring busy work passing themselves off as exciting hands-on activities, you're not alone. This book is designed for real-life classrooms where teachers have no time, no budget, and eager students just waiting for something to engage them. This book contains ten complete ideas that can be easily adapted for any topic in any secondary subject area. It's meant to be as easy as possible for any teacher to start using immediately. *Real-World Math, Grades 1 - 2* Carroll, 2008-08-25 Connect mathematics to problems that students have in their daily lives using Real World Math for grades 1-2. The activities in this 64-page book are designed to help students become independent problem solvers using patterns, elapsed time, calendars, measurement, and money. Reproducibles with multiple choice and open-ended questions support NCTM Standards while suggested teaching strategies and extensions provide support for further learning challenges. **The Math Teacher's Problem-a-Day, Grades 4-8** Judith A. Muschla, Gary R. Muschla, 2008-04-11 From bestselling authors Judith and Gary Muschla, The Math Teacher's Problem a Day is a hands-on resource containing 180 handy worksheets, one for each day of the school year, to help students in grades 4-8 acquire the skills needed to master mathematics. These reproducible worksheets are perfect for sponge activities, five-minute challenges to start or end a class period, that can also be used as supplemental lessons, homework, or extra credit. With problems based on the Standards and Focal Points of the National Council of Teachers of Mathematics, the book is designed to give students valuable practice in math skills using specific activities to enhance critical thinking and boost test scores. The topics covered focus on the core math concepts and skills required for middle school students, including Numbers and Operations, Algebra, Geometry, Measurement, and Data Analysis. Part of the 5 Minute Fundamentals series, The Math Teacher's Problem a Day is an important resource that will help today's students understand more concepts, make connections between branches of mathematics, and apply math skills to a variety of real-life problems. *Today's Mathematics, Activities and Instructional Ideas* James W. Heddens, William R. Speer, 2000-08-31 This classic allows readers to easily build a valuable set of ideas and reference materials for actual classroom use. Designed to aid the teacher in understanding mathematical concepts and relationships, the authors reflect recent recommendations from the National Council of Teachers of Mathematics Standards 2000. *Mathematics and Science Across the Curriculum*, 2002. Authentic Learning Activities: Number & Operation Brendan Kelly, 2000. **Mathematics Worksheets Don't Grow Dendrites** Marcia L. Tate, 2008-08-21 The author does a good job of describing the NCTM content standards and providing examples that incorporate recommendations from NCTM and other experts in the field on how best to deepen students' understanding of mathematics. Linda Kallam, Professor of Mathematics, Southeastern Oklahoma State University. A very useful resource for new and experienced teachers. The book will also equip administrators with strategies that they can model in

staff meetings and with teachers Pam Summers K 12 Mathematics Coordinator Lubbock Independent School District TX Engage students in effective meaningful experiences in mathematics Students engaged in active learning experiences gain long term retention of the skills and content they learn In this user friendly guide Marcia L Tate follows the successful format of her previous bestsellers and offers math teachers 20 powerful brain based teaching strategies that translate into meaningful firsthand experiences for all learners Mathematics Worksheets Don t Grow Dendrites provides educators with creative ways to incorporate visual auditory kinesthetic and tactile modalities and promote increased academic achievement in mathematics The author also focuses on the core NCTM focal points for algebra geometry numbers and operations data analysis and probability problem solving reasoning and proof communication connections and representation The chapters offer A what why and how for each strategy Specific brain compatible mathematics activities and lessons submitted by real teachers from across the country Space for teachers to reflect on and apply individual strategies in their lessons With a bibliography of math and literature resources and a lesson planning guide this book can transform classrooms into places where students excel academically and where learning is fun
