

The background of the slide is a close-up photograph of numerous water droplets of varying sizes on a dark, reflective surface. The droplets are illuminated from above, creating bright highlights and soft shadows, giving them a three-dimensional appearance. The overall color palette is dark and moody, with shades of black, grey, and muted green.

## Meaning And Textuality:

*Meaning and Textuality* François Rastier, Frank Collins, Paul Perron, 1997 Rastier proposes a theoretical framework for the semantic description and typology of texts establishing a critical debate among various streams of research before arriving at a synthesis of literary semiotics, thematic and linguistic semantics The Princeton Encyclopedia of Poetry and Poetics Stephen Cushman, Clare Cavanagh, Jahan Ramazani, Paul Rouzer, 2012-08-26 The most important poetry reference for more than four decades now fully updated for the twenty first century Through three editions over more than four decades The Princeton Encyclopedia of Poetry and Poetics has built an unrivaled reputation as the most comprehensive and authoritative reference for students, scholars and poets on all aspects of its subject: history, movements, genres, prosody, rhetorical devices, critical terms and more. Now this landmark work has been thoroughly revised and updated for the twenty first century. Compiled by an entirely new team of editors, the fourth edition, the first new edition in almost twenty years, reflects recent changes in literary and cultural studies, providing up to date coverage and giving greater attention to the international aspects of poetry, all while preserving the best of the previous volumes. At well over a million words and more than 1 000 entries, the Encyclopedia has unparalleled breadth and depth. Entries range in length from brief paragraphs to major essays of 15 000 words, offering a more thorough treatment, including expert synthesis and indispensable bibliographies, than conventional handbooks or dictionaries. This is a book that no reader or writer of poetry will want to be without. Thoroughly revised and updated by a new editorial team for twenty first century students, scholars and poets. More than 250 new entries cover recent terms, movements and related topics. Broader international coverage includes articles on the poetries of more than 110 nations, regions and languages. Expanded coverage of poetries of the non Western and developing worlds. Updated bibliographies and cross references. New, easier to use page design. Fully indexed for the first time.

Thiselton, 1992 This book explores the rapidly growing interdisciplinary area of hermeneutics and its significance for biblical studies combining wide fundamental rigorous and creative theoretical concerns with practical questions about how we read biblical texts

**A Theory of Textuality** Jorge J. E. Gracia, 1995-07-01 This is the first comprehensive and systematic theory of textuality that takes into account the relevant views of both analytic and Continental thinkers and also of major historical figures The author shows that most of the confusion surrounding textuality is the result of three factors a too narrow understanding of the category a lack of a proper distinction among logical epistemological and metaphysical issues and a lack of proper grounding of epistemological and metaphysical questions on logic analyses The author begins with a logical analysis of the notion of text resulting in a definition that serves as the basis for the distinctions he subsequently draws between texts on the one hand and language artifacts and art objects on the other and for the classification of texts according to their modality and function The second part of the book uses the conclusions of the first part to solve the various epistemological issues which have been raised about texts by philosophers of language semioticians hermeneuticists literary critics semanticists aestheticians and historiographers

**The Idea of a Text and the Nature of Textual Meaning** Anders Pettersson, 2017-04-15 In his account of text and textual meaning Pettersson demonstrates that a text as commonly conceived is not only a verbal structure but also a physical entity two kinds of phenomena which do not in fact add up to a unitary object He describes this current notion of text as convenient enough for many practical purposes but inadequate in discussions of a theoretically more demanding nature Having clearly demonstrated its intellectual drawbacks he develops an alternative boldly revisionary way of thinking about text and textual meaning His careful argument is in challenging dialogue with assumptions about language

in use to be found in a wide range of present day literary theory linguistics philosophical aesthetics and philosophy of language
