Measurement, Design, and Analysis Elazar J. Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin s goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

Selecting Research Methods: Methods for coding and measuring data W. Paul Vogt, 2008 Selecting Research Methods provides advice from prominent social scientists concerning the most crucial steps for planning and undertaking meaningful research selecting the methods to be used Contributors to the collection address methodological choices in four stages design sampling coding and measurement and analysis The volumes provide an integrated approach to methodological choice in two ways First the contributions range from the early decisions about design options through the concluding choices about analyzing interpreting and presenting results Second the collection is integrated because it addresses the needs of projects that collect qualitative evidence quantitative data or both Volume 1 concerns design choice the articles focus on selecting designs that are effective for answering research questions and

achieving the goals of the researcher Volume 2 is on sampling and includes in addition to sampling from populations advice on choosing methods for recruiting informants for interviews selecting sites for participant observation and assigning subjects to control and experimental groups Volume 3 reviews options for coding and measurement it emphasizes methodological choices that enable researchers to study concepts in ways that enhance the reliability and validity of the research Finally the articles included in Volume 4 review the range of choices available among methods to analyze results and interpret the meanings of evidence Personality Assessment Lauren B. Palcroft, Melissa V. Lopez, 2009 Personality assessment is the determination and evaluation of personality attributes by interviews observations tests or scales What then are the common properties of assessment regardless of which area is examined It is proposed that there are three common denominators a Decisions b Procedures and c Data acquisition In general assessment may be defined as a procedure whereby data is collected for decision making purposes Specifically then psychological assessment is a procedure whereby data is collected for making decisions about people Such a definition although short and simple has a major advantage in emphasising the role of decision making in assessment This book presents the latest research developments in the field
