**Construction Materials** Peter Domone, John Illston, 2010-06-10 So far in the twenty first century there have been many developments in our understanding of materials behaviour and in their technology and use This new edition has been expanded to cover recent developments such as the use of glass as a structural material It also now examines the contribution that material selection makes to sustainable construction practice considering the availability of raw materials production recycling and reuse which all contribute to the life cycle assessment of structures As well as being brought up to date with current usage and performance standards each section now also contains an extra chapter on recycling Covers the following materials metals concrete ceramics including bricks and masonry polymers fibre composites bituminous materials timber glass This new edition maintains our familiar and

accessible format starting with fundamental principles and continuing with a section on each of the major groups of materials. It gives you a clear and comprehensive perspective on the whole range of materials used in modern construction. A must have for Civil and Structural engineering students and for students of architecture surveying or construction on courses which require an understanding of materials. *Sectoral Science and Technology Plan for Consumer Industries: Textiles, leather, salt & photographic materials* India.
