cultural policies capital cities and the place of municipal government and the development of subnational cultural relations Finally this book also acknowledges the diversity of federations and federalisms and provides a portrait of different types of relationships between federal institutions and the cultural sphere Strategy in a Turbulent Era Ashton L. Hawk, Marcus M. Larsen, Michael J. Leiblein, Jeffrey J. Reuer, 2024-01-18 Offering a practical and phenomenon driven perspective Strategy in a Turbulent Era expertly analyses questions relating to strategy in light of different forms of turbulence From the global COVID 19 pandemic outbreak to the escalation in number and far reaching implications of new technologies such as artificial intelligence and cryptocurrencies this timely book explores how recent sources of turbulence are rapidly transforming the nature and dynamics of global competition *Handbook of Territorial Politics* Klaus Detterbeck, Eve Hepburn, 2018-08-31 The study of territorial politics has enjoyed a renaissance in the last thirty years Scholars have questioned the state centric assumptions upon which mainstream social science has been built pointing to the territorial re distribution of power across and within states This Handbook brings together leading scholars to demonstrate how territory has shaped institutional structures public policies elections political parties and identity across the world Offering theoretical comparative and empirical insights this book provides a comprehensive overview of the impact of territory on modern political economic and social life **Federalism and Decentralisation in Eastern Europe** Miodrag A. Jovanović, Slobodan Samardžić, 2007 Although fully aware of the gravity of violent ethnic wars and challenges that multiethnic societies pose for any democratic polity both authors endorse multicultural democracy Jovanovic argues against territorial accommodation of ethnic demands and in favour of community based minority rights policy Samardzic understands territorial decentralisation as an indispensable guarantee for a fully fledged protection of minority ethnic groups Despite this major conceptual difference they put forward democratic legitimacy as a fundamental condition for peaceful multiethnic societies Multiculturalism Christopher S. Raj, Marie McAndrew, 2009 Transcripts of papers presented at an international conference **Constitutional Politics in Multinational Democracies** André Lecours, Nikola Brassard-Dion, Guy Laforest, 2021-07-15 Constitutional politics is exceptionally intense and unpredictable It involves negotiations over the very nature of the state and the implications of self determination Multinational democracies face pressing challenges to the existing order because they are composed of communities with distinct cultures histories and aspirations striving to coexist under mutually agreed upon terms Conflict over the recognition of these multiple identities and the distribution of power and resources is inevitable and indeed part of what defines democratic life in multinational societies In Constitutional Politics in Multinational Democracies Andr Lecours Nikola Brassard Dion and Guy Laforest bring together experts on multinational democracies to analyze the claims of minority nations about their political future and the responses they elicit through constitutional politics Essays focus on the nature of these states and the actors and political process within them This framework allows for a multidimensional examination of crucial political periods in these democracies by assessing what constitutional politics is

who is involved in it and how it happens Case studies include Catalonia and Spain Puerto Rico and the United States Scotland and the United Kingdom Belgium Bosnia and Herzegovina and Quebec and the M tis People in Canada Theoretically significant and empirically rich Constitutional Politics in Multinational Democracies is a necessary read for any student of multinationalism

large transitional economies **Community, Scale, and Regional Governance** Liesbet Hooghe, Gary Marks, 2016-08-18

This is the second of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes and consequences of governance within the state. The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self-government. The first has to do with the character of the public goods provided by government: their scale, economies, externalities and informational asymmetries. The second has to do with how people conceive and construct the groups to which they feel themselves belonging. In this book, the authors demonstrate that scale and community are principles that can help explain some basic features of governance, including the growth of multiple tiers over the past six decades, how jurisdictions are designed, why governance within the state has become differentiated, and the extent to which regions exert authority. The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring, one must engage human passions regarding self-rule to explain variation in the structures of rule over time and around the world.

Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work but it is pluralistic in terms of disciplinary specialization, research design, method and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies and studies with a national, regional or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford.

Minority Nations in Multinational Federations Min Reuchamps, 2014-12-17

Multinational federations rest on the coexistence of two or more nations within a single polity. Within these federations, minority nations play a significant role as their character differs from the other building blocks of the federation. This edited volume offers a comprehensive comparison of two such minority nations: Quebec in Canada and Wallonia in Belgium, which exemplifies many dimensions, themes and issues highly resonant to the study of federalism and regionalism across the globe. Quebec and Wallonia have experienced several decades of federal dynamics where both regions have had to find their way as a minority nation in a multinational federation. For those studying federalism and regionalism

their importance lies in a number of characteristics but principally in the fact of these minority nations have transformed into mini states with fully fledged legislative powers within their federation This book seeks to study the specific dynamics within these small worlds and between them and the rest of the federation This text will be of key interest to students and scholars of federalism nationalism and regionalism comparative politics and policies political ideas and social movements

Routledge Studies in Federalism and Decentralization, 2017* The Case for Multinational Federalism Alain-G.

Gagnon, 2009-09-10 Throughout the world liberal democracies are grappling with increasing claims made in the name of minority national socio cultural and ethno cultural identities that seek greater recognition in the institutions of the nation state This work inserts itself into debates centred on diversity through a normative and empirical analytical assessment of the political sociology of multinational democracies The main thread of the arguments put forward is that federalism in both its institutional manifestations and its sociological properties constitutes a promising avenue for the management of cohabitating political communities and for the affirmation of collective identities within states that are constituted by two or more nations Author Alain G Gagnon develops his argument by contending that the federal principle allows for the exercise of advanced democratic practices within nation states permitting internal nations to openly affirm the bases of adherence to a common political project At the same time he argues that federalism nourishes the development of distinct collective traditions that serve to benefit all parties to the association It is concluded that only in such a scenario will the elusive pursuit of an authentic and shared loyalty underpin multinational states and ensure their stability in contrast to the instrumental sentiments of belonging engendered by procedural territorial federal models Focusing primarily on the Canadian case this book also draws inspiration from other federal states Belgium the United States as well as federalizing states Spain the United Kingdom It will be of keen interest to students and scholars of Politics European Studies along with Nationalism and Federalism Studies **Comparative Federalism and Covid-19** Nico Steytler, 2021-10-27 This comprehensive scholarly book on comparative federalism and the Covid 19 pandemic is written by some of the world's leading federal scholars and national experts The Covid 19 pandemic presented an unprecedented emergency for countries worldwide including all those with a federal or hybrid federal system of government which account for more than 40 per cent of the world's population With case studies from 19 federal countries this book explores the core elements of federalism that came to the fore in combatting the pandemic the division of responsibilities disaster management health care social welfare and education the need for centralisation and intergovernmental relations and cooperation As the pandemic struck federal countries at roughly the same time it provided a unique opportunity for comparative research on the question of how the various federal systems responded The authors adopt a multidisciplinary approach to question whether federalism has been a help or a hindrance in tackling the pandemic The value of the book lies in understanding how the Covid 19 pandemic affected federal dynamics and how it may have changed them as well as providing useful lessons for how to combat such pandemics

in federal countries in the future This book will be of great interest to students and scholars of politics and international relations comparative federalism health care and disaster management The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Minority Accommodation through Territorial and Non-Territorial Autonomy Tove H. Malloy, Francesco Palermo, 2015-10-08 Minority Accommodation through Territorial and Non-Territorial Autonomy explores the relationship between minority territory and autonomy and how it informs our understanding of non-territorial autonomy NTA as a strategy for accommodating ethno-cultural diversity in modern societies While territorial autonomy TA is defined by a claim to a certain territory NTA does not assume that it is derived from any particular right to territory allocated to groups that are dispersed among the majority while belonging to a certain self-identified notion of group identity In seeking to understand the value of NTA as a public policy tool for social cohesion this volume critically dissects the autonomy arrangements of both NTA and TA and through a conceptual analysis and case study examination of the two models rethinks the viability of autonomy arrangements as institutions of diversity management This is the second volume in a five-part series exploring the protection and representation of minorities through non-territorial means examining this paradox within law and international relations with specific attention to non-territorial autonomy NTA

Routledge Handbook of Regionalism & Federalism John Loughlin, John Kincaid, Wilfried Swenden, 2013-07-18 Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting-edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism the EU NAFTA and the African Union Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars this work will be an essential reference source for all students and scholars of international politics comparative politics and international relations
