Murder On A Horse Trail The Disappearance Of Chandra Levy:

Murder on a Horse Trail Ralph Daugherty, 2004-04-26 Ralph Daugherty is a computer programmer who was drawn to the Chandra Levy case based on coverage of the critical clues to her disappearance found on Chandra's computer. He has posted over 7 000 comments as rd on Chandra boards on the Internet and has set up his own board dedicated to Chandra Levy, Laci Peterson and missing women at www.justiceforchandra.com. He has now pulled together the reported facts with his analysis and questions honed by discussions with hundreds of other posters since Chandra's disappearance. This complex mystery is a compelling story and *Murder On A Horse Trail* tries to do justice to that story. **Criminal Investigative**

Failures D. Kim Rossmo, 2008-12-15 *Avoid Major Investigative Traps* What causes competent and dedicated investigators to make avoidable mistakes jeopardizing the successful resolution of their cases? Authored by a 21 year police veteran and university research professor, *Criminal Investigative Failures* comprehensively defines and discusses the causes and problems most common to failure. **Geographic Profiling** D. Kim Rossmo, 2005-04-02

Geographic Profiling explores this cutting edge investigative methodology for determining the most probable area of an offender's residence by analyzing the locations of a series of connected crimes. Geoprofiling allows police detectives and law enforcement officers to prioritize suspects, focus their investigations and manage information overload. This extensive and exhaustive work explains the underlying theories and operational principles of the methodology. To provide context, extensive reviews of the research on serial murder, rape and arson, stranger child murder, behavioral psychological profiling, linkage analysis and the geography of crime are included. As any police officer who has walked a beat or worked a crime scene knows, streets have hot spots, patterns and rhythms. Understanding the varied geographic information in a crime series can be challenging. Renowned expert Kim Rossmo explains the concepts and applications of geographic profiling and in this second edition updates his groundbreaking book with informative and engaging figures, tables and examples. A range of applications are discussed, including suspect prioritization, database searches, tactical response plans, missing person investigations, clandestine grave identification and the role of geography in wrongful conviction reviews. Dr. Rossmo discusses the nature of police inquiries, criminal evidence, investigative challenges and failures, and more. The book explores the application of geographic profiling to violent and property crime, single offenses, epidemiology, counterterrorism, insurgency and even earthquake epicenter and pirate base prediction. Fascinating new case studies include the Golden State Killer, Operation Lynx, the Zodiac Killer, the Lindbergh baby kidnapping, the DC Snipers and the Austin Midnight Assassin. *Geographic Profiling* is a must-have reference for detectives, crime analysts and law enforcement officers who want to follow the geographic clues in their cases. Its clear presentation makes it ideal for college courses, police training, university scholars and students of true crime. *Great Events from*
