## **Music Gender Education**

Music, Gender, Education Lucy Green, 1997-03-28 This book focuses on the role of education in relation to music and gender. Invoking a concept of musical patriarchy and a theory of the social construction of musical meanings, Lucy Green shows how women's musical practices and gendered musical meanings have been reproduced hand in hand through history. Covering a wide range of music including classical, jazz and popular styles, Dr Green uses ethnographic methods to convey the everyday interactions and experiences of girls, boys and their teachers. She views the contemporary school music classroom as a microcosm of the wider society and reveals the participation of music education in the continued production and reproduction of gendered musical practices and meanings. **Music, Gender and Education** Lucy Green, 1993

*Bourdieu and the Sociology of Music Education* Pamela Burnard, Ylva Hofvander Trulsson, 2016-04-15 Pierre Bourdieu has been an extraordinarily influential figure in the sociology of music. For over four decades his concepts have helped to generate both empirical and theoretical interventions in the field of musical study. His impact on the sociology of music taste in particular has been profound; his ideas directly informing our understandings of how musical preferences reflect and reproduce inequalities between social classes, ethnic groups and men and women. *Bourdieu and the Sociology of Music Education* draws together a group of international researchers, academics and artist practitioners who offer a critical introduction and exploration of Pierre Bourdieu's rich generative conceptual tools for advancing sociological views of music education. By employing perspectives from Bourdieu's work on distinction and judgement and his conceptualisation of fields, habitus and capitals in relation to music education, contributing authors explore the ways in which Bourdieu's work can be applied to music education as a means of linking school institutional habitus and learning and curriculum and family class habitus. The volume includes research perspectives and studies of how Bourdieu's tools have been applied in industry and educational contexts including the primary, secondary and higher music education sectors. The volume begins with an introduction to Bourdieu's contribution to theory and methodology and then goes on to deal in detail with illustrative substantive studies. The concluding chapter is an extended essay that reflects on and critiques the application of Bourdieu's work and examines the ways in which the studies contained in the volume advance understanding. The book contributes new perspectives to our understanding of Bourdieu's tools across diverse settings and practices of music education. **Music, Gender and Education** Deborah L. Quow, **Transforming Music Education** Estelle R. Jorgensen, 2003 Examines the reasons why music education should be transformed and suggests alternative educational models and strategies.

**Technology and the Gendering of Music Education** Dr Victoria Armstrong, 2013-01-28 Critical of technologically determinist assumptions underpinning current educational policy Victoria Armstrong argues that this growing technicism has grave implications for the music classroom where composition is often synonymous with the music technology suite The use of computers and associated compositional software in music education is frequently decontextualized from cultural and social relationships thereby ignoring the fact that new technologies are used and developed within existing social spaces that are always already delineated along gender lines Armstrong suggests these gender technology relations have a profound effect on the ways adolescents compose music as well as how gendered identities in the technologized music classroom are constructed Drawing together perspectives from the sociology of science and technology studies STS and the sociology of music Armstrong examines the gendered processes and practices that contribute to how students learn about technology the repertoire of teacher and student talk its effect on student confidence and the issue of male control of technological knowledge Even though girls and female teachers have technological knowledge and skill the continuing material and symbolic associations of technology with men and masculinity contribute to the perception of women as less able and less interested in all things technological In light of the fact that music technology is now central to many music making practices across all sectors of education from primary secondary through to higher education this book provides a timely critical analysis that powerfully demonstrates why the relationship between gender and music technology should remain an important empirical consideration
