Affect and Emotion in Human-Computer Interaction Christian Peter,Russell Beale,2008-08-25 Affect and emotion play an important role in our everyday lives They are present whatever we do wherever we are and wherever we go without us being aware of them for much of the time When it comes to interaction be it with humans technology or humans via technology we suddenly become more aware of emotion either by seeing the other s emotional expression or by not getting an emotional response while anticipating one Given this it seems only sensible to explore affect and emotion in human computer interaction to investigate the underlying principles to study the role they play to develop methods to quantify them and to finally build applications that make use of them This is the research field for which over ten years ago Rosalind Picard coined the phrase affective computing The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human technology interaction It covers theoretical issues user experience and design aspects as well as sensing issues and reports on a number of affective applications that have been developed in recent years *Civilizations Beyond Earth* Douglas A.
