Perspectives On Human Animal Communication Internatural Communication:

Perspectives on Human-animal Communication Emily Plec, 2013 Despite its inherent interdisciplinarity the Communication discipline has remained an almost entirely anthropocentric enterprise This book represents early and prominent forays into the subject of human animal communication from a Communication Studies perspective an effort that brings a discipline too long defined by that fallacy of division human or nonhuman into conversation with animal studies biosemiotics and environmental communication as well as other recent intellectual and activist movements for reconceptualizing relationships and interactions in the biosphere This book is a much needed point of entry for future scholarship on animal human communication as well as the whole range of communication possibilities among the more than human world It offers a groundbreaking transformation of higher education by charting new directions for communication research policy formation and personal and professional practices involving animals *The Sensory Modes of Animal Rhetorics* Alex C. Parrish, 2021-07-14 *The Sensory Modes of Animal Rhetorics* A Hoot in the Light presents the latest research in animal perception and cognition in the context of rhetorical theory Alex C Parrish explores the science of animal signaling that shows human and nonhuman animals share similar rhetorical strategies such as communicating to manipulate or persuade which suggests the vast impact sensory modalities have on communication in nature The book demonstrates new ways of seeing humans and how we have separated ourselves from and subjectified the animal rhetor This type of cross species study allows us to trace the origins of our own persuasive behaviors providing a deeper and more inclusive history of rhetoric than ever before **Critical Approaches to Climate Change and Civic Action** Anabela Carvalho, Julie Doyle, Chris Russill, 2021-09-10 **Multiple Knowledges. Learning from/with Other Beings** Joanna Godlewicz-Adamiec, Paweł Piszczatowski, Justyna Włodarczyk, Piotr Kociumbas, 2022-04-11 This issue of *Transpositiones* showcases a range of interdisciplinary and critical approaches to classic and alternative conceptions of cognition and sources of knowledge The articles reflect on the many types of sensory and extrasensory knowledge available to non human beings and wonder whether and in what ways can we as humans perceive conceptualize and respect these knowledges The authors highlight how the existence of multiple knowledges questions species boundaries and onto and epistemological perspectives in the process of learning not only about other beings but also from and along with them This selection of texts attempts to contribute to overcoming the anthropocentric perception of subjectivity and to the abandoning of an optics based on the dualisms of nature and culture spirit and matter subject and object animate and inanimate nature physis and techne etc which are so firmly entrenched in the Western intellectual tradition *Linguistics and Language Behavior Abstracts* , 1993 *International Journal of Anthropology* , 1990 *Primates in Perspective* Christina J. Campbell, 2007 *Primates in Perspective* is the first edited volume to offer a comprehensive overview of primatology since 1987 Forty four original essays by fifty nine leading researchers in the field today provide wide ranging and contemporary coverage of all of the major areas

of primatology Arranged in six sections the text begins with an introduction to primatology and a review of the natural history of the major taxonomic groups within the order Primates It goes on to cover methodologies and research design for both field and captive settings primate reproduction primate ecology and conservation and their roles in the daily lives of primates and such aspects of social behavior and intelligence as communication learning and cognition The volume ends with a concluding chapter by the editors that discusses the future of primatological research Ideal for introductory primatology courses *Primates in Perspective* can also be used in upper division behavior and conservation courses Additionally it is an invaluable reference tool for primate researchers
