Petroleum Operations Agreements Developing Countries:

Petroleum Company Operations and Agreements in the Developing Countries Raymond F. Mikesell, 2016-02-12

Originally published in 1984 this study focuses on petroleum agreements between non OPEC LDCs with oil importing LDCs and how issues such as high oil prices affect each country. The information presented in this study was drawn from interviews with petroleum officials in petroleum companies, petroleum ministries and unpublished documents such as contracts and focussing on case studies of countries such as Peru, Guatemala and Malaysia. This title will be of interest to students of environmental studies and economics.

Petroleum Investment Policies in Developing Countries Nicky Beredjick, Thomas W. Wälde, Ian Townsend Gault, 1988. Twelve chapters cover a wide variety of topics including finance contracts, political risk, insurance, legal issues, economics and technical cooperation. All treatment of these subjects focuses on conditions expected to exist in the mid 1990s. No subject index or bibliography.

Annotation copyright **Oil & Gas Databook for Developing Countries** Derek Fee, 2012-12-06. In order to alleviate their problems many less developed countries (LDCs) are endeavoring to develop to the full their energy resources and in particular their hydrocarbon resources. However, the development of these resources is hindered by many factors among which are the following: badly established estimates of indigenous resources under exploration, lack of competent Government institutions to monitor the hydrocarbon sector, lack of local markets to exploit non oil hydrocarbon finds, refineries which are outdated, producing the wrong product mix and where economies of scale make upgrading difficult. The purpose of this work is to examine the hydrocarbon sector in the African, Caribbean and Pacific (ACP) group of countries. An examination of such a diverse group of nations on a global scale is difficult since the group includes relatively rich countries such as Trinidad and Tobago with a GNP per capita of 4000 to the sub Saharan countries such as Mali with a GNP per capita of 120. No easy solutions will be presented to improve the present energy situation in these countries but the reasons for the lack of hydrocarbon development will be examined. The work of the World Bank and similar international financial institutions will be assessed and a potted review of the hydrocarbon sector in each country will be presented.
